Sonavation OLED display (<http://www.sonavation.com/>)

(<http://www.sonavation.com/>) Sonavation announced its organic light-emitting diode displays for secure fingerprint imaging on device screens. The OLED ultrasound biometric tool not only increases the amount of usable device screen area, but also aims to ensure greater security for banking and financial transactions, as well as smart phone and Internet of Things access.

BitLox bitcoin wallets (<https://www.bitlox.com/>)

(<https://www.bitlox.com/>) BitLox unveiled BitLox Ultimate and BitLox Advanced, two titanium- and alloy-encased wallets created to keep one's bitcoins safe. The size of a credit card, the encrypted device boasts layers of PIN interface and Bluetooth LE. The wallet also permits Darknet, Tor, I2P, and TailsOS connectability.
