

RETHINK WHAT YOUR AIR HOSE CAN DO.

## SYLC AIR POLISHING WILL BLOW YOU AWAY

It's time to reconsider what you know about air polishing. The new Sylec™ SmarTip applicator turns any air hose into an air-polishing unit. Easily attaching to your air hose, aerosol-eliminating Sylec SmarTip cleans using neutral bioactive crystals that reduce sensitivity, rebuilds tooth structure and removes staining. At seven dollars a treatment - and backed by our 100% performance guarantee - it's the smart way to clean teeth without the mess or cost of other air polishing systems. Rethink the possibilities of air polishing with Sylec and SmarTip.

# REJUV, RESTORE REBUILD

## Therapeutic Prophy Treatment

### REJUV

Now you can redefine your operatory while rejuvenating enamel with the Sylc™ SmarTip. Attaching directly to your air hose, the SmarTip attachment is the hassle-free way to deliver a mess-free air polishing procedure. But convenience is just the beginning.

### RESTORE

Sylc prophy powder is a clinically proven way to restore lost dentin while reducing sensitivity. Powered by fast-acting bioactive minerals, Sylc's works with saliva to form hydroxycarbonate apatite to occlude open tubules.

### REBUILD

In rebuilding tooth structure, Sylc restores teeth to their natural, radiant appearance. Combined with Sylc's remarkable cleaning power, Sylc will give patients noticeably whiter teeth. Reinvent the way you perform air polishing and reap the rewards with Sylc SmarTip.

# REJUV, RESTORE REBUILD

Therapeutic Prophy Treatment

## REJUV

Sylc™ provide your patients with lasting relief from hypersensitivity for up to six months after treatment. Sylc™ Therapeutic Prophy Powder occludes more tubules than many other procedures and isn't washed away or dissolved after treatment.

## RESTORE

With Sylc's fast-acting bioactive minerals, you can restore your patient's natural dentin and tooth enamel with each cleaning. Sylc's unique formula works with water or saliva to form hydroxycarbonate apatite crystals that biologically bond into mineral surfaces.

## REBUILD

Repair eroded tooth surfaces using Sylc and restore the natural, radiant appearance of healthy teeth. Combined with Sylc's remarkable cleaning power, patients will notice significantly whiter teeth immediately after treatment.
