

Your Pre-Flooring Problem Solvers

The Premier Installer of Self-Leveling Underlayment

Why Accufloor?

Accufloor solves all of your transition problems, ramping issues and pre-flooring fiascos that cause expensive delays to your project and we do it with total commitment to customer service!

When combining Accufloor SLU with our expert installation crews, you receive a streamlined, turnkey solution which, in turn, promotes superior quality and productivity for the remainder of your project.

The Accufloor Solution - No hassles with 100% guaranteed quality and performance!

Accufloor Self-Leveling Underlayment (SLU)

- **Compare Accufloor SLU specifications to Ardex K-15!**
Our material saves you money and performs just like the commonly known other brand.
- With our SLU, we are able to float, fix, and level floors and slabs where gypsum based materials cannot perform! Our exceptional material can be placed from feather depths to three inches deep.
- We are mobile and we are fast! We can pump up to 2,000 feet per hour!
- We also manufacture our own products. This means we can provide materials to your job site with seamless precision!
- **Compressive strength of 5500 psi !!**

Accufloor RampCrete (RC)

Are you finding the need for transition ramping throughout your project?

Does the current material being used crack and underperform?

Accufloor RC is a revolutionary material manufactured by Accufloor for the purpose of constructing interior or exterior ADA Ramps. Accufloor RC will not crack and outperforms anything you have ever seen!

**For the Accufloor Advantage,

Your Pre-Flooring Problem Solvers

The Premier Installer of Self-Leveling Underlayment

Austin • Bermuda • Charlotte • Denver • Detroit • Kansas City • Las Vegas • Miami • Minneapolis • Phoenix

Our Customers

Our list of satisfied customers is growing due to our outstanding solutions and competitive pricing. In fact, we have just completed pumping the Miami Dolphin Stadium Expansion totaling over 11,000, 55lb. bags of our self leveler. As you can imagine, this project presented many different challenges in which we surpassed expectations in our ability to perform all required tasks by presenting alternative, on-the-go solutions to common issues found at all construction sites. This ability to solve problems enabled the remainder of the project to be finished on time! Below is a list of a few of our larger projects where Accufloor products were placed and some of our recent clients.

Projects

Marquis Miami - Multiple floors of SLU and RC (Current)

Juhl Las Vegas - Over 12,000 bags of SLU (Current)

Smith Barney at Miami Center - 2100 bags of SLU in 3 days! (Completed)

University of Miami AMEDIC Lab - RC for laboratory drain rooms (Completed)
