"Calamity always comes unexpectedly…"

The earth was devastated by the sudden impact of a giant meteor. Many lives lost. Boundaries between regions of the country disappeared completely. The remnants of humanity that had survived the extinction began to form small colonies. However, the remnants of the meteors left on land spread a strong radiation effect which impacted living things in the surroundings. Many people died because of radiation, those who survived even mutated into an inhumane, monstrous form. They are called Shifters.

"This world has denied us, and now it is our turn to deny the world…!"

Because their physical form and strength are different than ordinary humans, the Shifters are feared and ostracized. Discrimination against Shifters bring up an ambitious figure who intend to turn things around and change Shifters from the oppressed to the oppressor, and become ruler of the world. He is Isaac, the leader of the Shifter's revolution move. After that, he also founded a giant colony whose inhabitants were Shifters, called Utopia. With the help of Hugo the mad scientist, Utopia is able to extract the power of meteor radiation and use it to forcibly transform ordinary humans into loyal Shifters. Isaac's ambition is to turn all humans into Shifters and slaughter those who are refuse to submit to him.

"I won't let things go your way! We still have hope!"

The Humans didn't want to give up just like that. People who took refuge in the colony of White Valley continue to fight against Utopia led by the former veteran soldier, Rogue. In the end, a team of White Valley scientists who researched meteor radiation led by the genius Gilbert succeeded in extracting the meteor's power into raw materials for making sophisticated weapons, Plasma Weapons, without being affected by the radiation. With the Plasma Weapons, Rogue and the inhabitants of White Valley prepare to begin an all-out battle to destroy Utopia and stop Isaac's ambitions...
