Snickers[®]
WORKWEAR

Work Together

No matter if you’re in construction, designing workwear or pushing for climate change, the way to go is to join forces and work together.

This year we have expanded our range of pants that follow you wherever you go and, in collaboration with the team at D3O®, we have created our most advanced knee protection yet. We’re also ramping up our efforts to integrate sustainable practices which involves working together with responsible production facilities and industry initiatives. We aim to help our industry and the world we’re a part of move in the right direction.

Driven by a passion for innovation, craftsmanship, and people, we develop functional workwear crafted to work together with the people who use them.

Holster Pockets

The no.1 Workwear Brand

With our wide selection of work pants, ranging from full stretch slim fits to high visibility shell pants, in 22 different sizes, you can rest assured you can find the trouser that works for you.

We know a work pant has to be a lot of things. Keep you comfortable, carry your essentials, and protect your knees and legs from debris and hazards of the workplace. And look good, without limiting your mobility when climbing a ladder, dropping to your knees or squeezing into the car.

U6271
AllroundWork,
Full Stretch Pants

U6271 Full Stretch Pants

Our new full 4-way stretch pants is a true all-rounder that delivers great comfort and limitless mobility. With 4-way stretch throughout and CORDURA® reinforcements on the knees, these slim-fit trousers stretch in every direction, retain the perfect fit over time, and last many days on the job.

4-way Stretch Wherever You Go, I Follow

The general idea with using stretch in workwear is maximizing mobility. This makes work more comfortable. Modern stretch materials are extremely durable and can be tailored to a slimmer fit – resulting in both a good look and a garment that follows your every move.

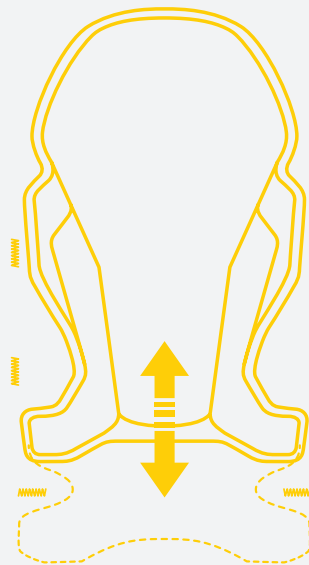

U9169
KneeGuard
D3O® Ergo Knee pads

Revolutionizing Knee Protection

You work with your hands but spend a lot of time on your knees.

In construction, carpentry, and craftsmanship, the body is your most important tool. We offer world-leading certified knee protection designed to keep you at work and make your knees last a lifetime. Made from innovative materials and with ergonomic design, our technically advanced pads work with the body and protect your knees from impacts and floor debris. Delivering supreme knee protection for all kinds of work.

U9169 D3O Ergo Kneepads

Our most advanced protection yet with light award-winning design, slim fit and D3O® material throughout. The pads flex for a personalized fit yet hardens instantly on impact: minimizing the level of energy transmitted to the body. Providing both supreme comfort and insanely strong protection.

The kneepad system in Snickers Workwear trousers makes sure the pads sit firmly in the right place — which is crucial for reliable knee protection.

For a Better Working Climate

Regardless of what season you’re in or the task at hand, you need clothes that help you maintain the right comfort and temperature.

There are always moments during the workday when you get too hot or too cool. You’re likely mixing stationary tasks with physical work multiple times during the day.

Designed with input from end users, and using innovative materials like 37.5®, Coolmax® and GORE-TEX® we’ve created workwear that makes sure you stay comfortable. No matter if you’re working under a blazing sun or in the freezing cold.

37.5® Technology

In fabrics with 37.5® technology, patented natural active particles permanently embedded at the fiber level capture and release moisture vapor. By actively responding to body heat, the material speeds up the conversion of liquid to vapor keeping you dry and perfectly comfortable.

GORE-TEX®

Technical garments with GORE-TEX® are extremely durable, waterproof and are guaranteed to keep you dry and comfortable — all day long. The GORE-TEX® membrane has over 1.4 billion pores per square cm and the pores are 20,000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapor. This prevents water from penetrating, while it aids your body’s natural cooling process by allowing perspiration vapor to escape.

The Three Product Families

To meet different needs, our range is divided into three product families: RuffWork, FlexiWork and AllroundWork.

Snickers Workwear's broad product range offers a solution for every need. From work pants, jackets, shirts, base layers and overalls to knee protection, tool vests, accessories and more.

Our product families include solutions for the specific needs of different professions, such as products tailored to floor layers, painters, plumbers, carpenters and workers within the railway and energy sectors.

The **AllroundWork** collection offers true versatility when you need to be ready for everything. The garments are designed with amazing fit and exceptional functionality. A modern collection of workwear that emphasises fit, protection and comfort, this is an excellent and safe choice for everyday use.

The **FlexiWork** collection provides optimal working comfort, especially for work that calls for a lot of flexibility. The garments are lightweight and extremely durable. FlexiWork features a body-mapped design that has been carefully constructed to suit your body for the best possible fit.

The **RuffWork** collection have been carefully designed to provide long lasting protection in tough environments. The workwear is highly protective and has exceptional fit and comfort. The garments are constructed with hard-wearing fabrics and have been designed with functionality and durability in mind.

A Matter of Time

In a lot of ways, sustainability is a matter of time. Take your work pants for example: the longer they last the smaller environmental footprint they leave behind.

Sustainability is also a matter of time because the time for forceful sustainable action is now, anyone who follows news and developments regarding sustainability and global issues like we do knows that. And it is a matter of time because change doesn't happen overnight. Sustainability is an endeavour without end-state that takes continuous work and cannot be pawned down to a specific few, nor wait until tomorrow.

Knowing this we devote ourselves to continually improve the longevity of our entire range. We replace conventional materials and fibers with more sustainable alternatives, without ever compromising with the quality or longevity of the product. We are doing all in our power to integrate sustainable practices in everything we do. With dedication, and in close collaboration with responsible production facilities and industry initiatives, we push ourselves to improve how to design and produce workwear.

To stay on track, and day-by-day decrease the climate footprint our products and operation leaves behind, we measure everything meticulously. Working with 3rd party supply chain audits and Life Cycle Assessment, we can understand our environmental impact in detail – and address the big issues first. This way we make sure we do our part and contribute to moving the industry and world we're part of in the right direction.

We're Committed to:

- **Source 70% of our fibers as preferred fiber* by 2030 – aiming to reach 40% already by 2023.**
- **Use 80% sustainable cotton by 2023. Organic, recycled or sourced through the Better Cotton Initiative.**
- **Reduce our Green House Gas emissions by 50% in scope 1 and 2 until 2030, assess our impact and commitments for scope 3.**
- **Source materials and partner with suppliers and producers at the forefront of technology and innovation. This enables several advantages; improved trust and transparency – and continuous improvements throughout our supply chain.**
- **Work together with the Swedish Textile Initiative for Climate Change (STICA) to make real change.**

Read more about our sustainability work at www.snickersworkwear.com

*Preferred fibers is defined as fibers that have more sustainable properties in comparison to conventional options.

U6251 AllroundWork, Stretch Loose Fit Work Pants Holster Pockets

Loose fit pants designed for comfort and mobility during intense work. Full-stretch material and soft fabric provide freedom of movement and extra comfort. Holster pockets offer convenient storage for tools and equipment.

These AllroundWork Loose Fit Stretch Pants with holster pockets are designed for flexibility and comfort. The 2-way stretch fabric is supplemented by 4-way stretch panels in the rear for enhanced freedom of movement. The pants offer EN 14404 knee protection with reinforced KneeGuard™ pockets for additional comfort and ease of use. Holster, ruler, and cargo pockets provide easy access to tools and feature Cordura® reinforcement for durability. CORDURA® material lines other areas that are subject to stress for mobility and performance during intense work.

- 2-way stretch fabric with 4-way stretch panels in rear
- Stretch CORDURA® reinforced KneeGuard™ pockets
- CORDURA® reinforced holster, ruler, and cargo pockets
- Pre-bent legs
- CORDURA® material around the knees, gusset and crotch

Material: Main: 47% cotton, 53% polyester, 237 g/m². Contrast: 92% polyamide, 8% elastane, 250 g/m². Reinforcement 1: 100% polyamide CORDURA®, 205 g/m². Reinforcement 2: 100% polyester CORDURA®, 320 g/m².

Size: Available in 22 sizes. 30-48W / 30-34L

Fit: Loose

U6271 AllroundWork, Full Stretch Pants Holster Pockets

Everyday work pants with holster pockets designed for all kinds of work all year round. Made of durable 4-way stretch fabric, these versatile pants offer the comfort and mobility needed to carry out demanding tasks on a daily basis.

Full-stretch work pants made of durable 4-way stretch fabric for enhanced comfort and freedom of movement. Stretch CORDURA® at knees provides added mobility while pre-bent legs ensure optimal fit. In addition, these everyday multi-purpose pants feature CORDURA® holster pockets with zip compartment and ruler pocket as well as practical tool holders for efficient and convenient storage. KneeGuard™ system certified according to EN 14404. Slim fit.

- 4-way stretch fabric
- CORDURA® holster pockets with zip compartment
- Stretch CORDURA® at knees
- CORDURA® tool holders
- Ruler pocket with knife fastener and cargo pocket with ID card attachment

Material: Main: 91.5% polyamide, 8.5% elastane, 250 g/m². Reinforcement: 100% polyester CORDURA®, 320 g/m². Reinforcement: 100% polyamide CORDURA®, 205 g/m².

Size: Available in 22 sizes. 30-48W / 30-34L

Fit: Slim

U6351 AllroundWork, Stretch Loose Fit Work Pants

Versatile work pants with stretch and loose fit designed for optimal comfort and mobility during most types of work.

Everyday use work pants built to provide safety during intense work without compromising on working comfort and flexibility. The pants are made of comfortable and soft full stretch fabric that offers extra comfort. A combination of 4-way stretch fabric at the back and a gusset in crotch ensures unrestrained flexibility and freedom of movement. The stretch CORDURA® at the knees provides additional protection and comfort in intense work environments in accordance with standard EN14404.

- Stretch CORDURA® at the knees for extra flexibility
- Certified knee protection (standard EN14404)
- Pre-bent legs
- 4-way stretch fabric at the back
- CORDURA® reinforced holster, ruler, and cargo pockets

Kneepads

U9112 D3O® Lite Craftsmen Kneepads

Kneepads offering advanced knee protection during work that involves frequent kneeling. Designed to reduce strain during everyday use, the D3O® LITE material provides impact protection, ventilation and a lightweight construction.

High-tech kneepads featuring advanced knee protection with enhanced impact protection. Boasting an EN 14404 Type 2 Level 1 rating, the pads have been specifically designed for frequent kneeling in mobile work environments, guarding against pebbles and various debris on the floor. D3O® LITE material offers impact protection and shock absorption, while a curved, lightweight construction paired with a ventilating design ensures the kneepads are comfortable and easy to wear. In addition, a soft interior conforms to the knee, keeping the kneepads in place and distributing the pressure evenly while kneeling.

- D3O® LITE material for enhanced impact protection
- Ergonomic design for ventilation and stability
- Curved, lightweight design
- Durable and long-lasting design

Material: 100% polyolefin polymer blend.

Size: One-size

U9716 Hammer Holder

Advanced, hard-wearing hammer holder with ergonomic design. Angled for easy access and comfortable positioning of the hammer against the leg.

- Ergonomically angled design prevents the hammer-handle from hitting your leg when walking and getting in the way when bending down on your knees
- Easy to attach to Snickers tool fasteners, pants, belts, tool vest and Flexi Pocket system
- Angled slightly away from your body for easy access to the hammer
- Accommodates most hammers in the market
- Made in a hard-wearing yet flexible material that will not scrape delicate surfaces

Material: Hardwearing Hytel® from DuPont™ - 100% Thermoplastic Elastomer (TPE).

Size: One size

Guides & Info

Innovative work pants for specific needs.

For many hardworking men and women, pants are the most important tool in their daily work. However, the work differs for different types of jobs. Different needs require different work pants. That's why we have created the family concept — AllroundWork and RuffWork. Each family is optimized to ensure that professional tradesmen and women have the perfect work pants and workwear for all tasks and working conditions.

AllroundWork

The ultimate choice for everyday work in all kinds of environments.

U6271 AllroundWork, Full Stretch Pants Holster Pockets
See all AllroundWork pants on page 16-18.

RuffWork

Reinforced heavy-duty workwear for comfort and functionality in demanding environments.

U6214 RuffWork, Canvas+ Work Pants+ Holster Pockets
See all RuffWork pants on page 17.

Three fits and plenty of sizes for optimal protection.

The right fit and size is a matter of safety, comfort and protection. If the work pants don't have the right fit or are too big or small, your kneepads, for example, will not stay in the right position to protect your knees. Since our bodies are all different, Snickers Workwear offers three different fits – Slim fit, Regular fit and Loose fit – as well as one of the widest size ranges in the industry. With 22 different pants sizes available, you can be sure to find a pair that fits your body perfectly, ensuring optimal protection.

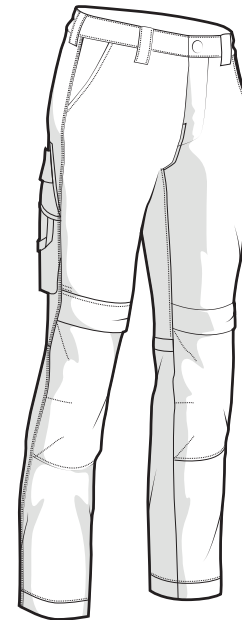

“WHEN YOU WEAR THE RIGHT-SIZED CLOTHING, THE REINFORCED ZONES, INSULATION AND VENTILATION ALL SIT IN THE RIGHT PLACES ON YOUR BODY.”

Kicki Kemze, Pattern Designer at Snickers Workwear

FITS

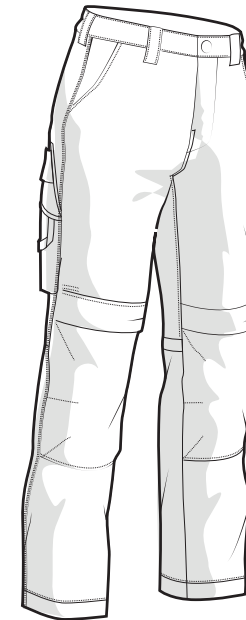

Slim fit

Slim fit garments are figure-hugging and quite tight, giving you a slimmer look. However, they are also soft, stretchy and follow your every move.

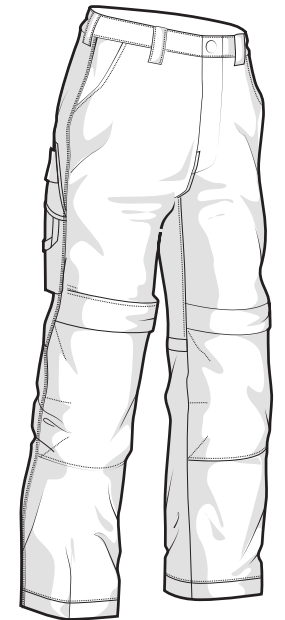

Regular fit

The garments follow your body shape, but are not tight. There is room for air between the garment and your body.

Loose fit

The loose fit garments sit securely at the waist as the regular fit but the legs are wider and airier.

SIZES

One of the widest selections in the industry

Snickers Workwear offers one of the widest selections of sizes available in the industry. 22 sizes of trousers with three different leg lengths! So whether your legs are short or long, we've got just the pants for you.

You only have one pair of knees. – Make sure they last a lifetime.

Hard-working tradesmen and women put more pressure on their knees than many top-athletes. The risk of knee injuries is therefore far higher among trade professionals than other occupations. By changing kneepads frequently, injuries and chronic pain can be avoided. A general rule is to use at least two pairs of kneepads for each pair of pants.

Snickers Workwear kneepads protect wearers against short- and long-term injuries, whether they occasionally work on their knees indoors or often kneel for prolonged periods of time.

Reliable Knee Protection.

KneeGuard™

The Snickers Workwear KneeGuard™ system is flexible in that it allows you to adjust the kneepads at two different heights to ensure correct positioning for maximum protection and comfort.

To find the kneepad that best suits your working situation, read more about our kneepads on the product pages.

How does it work?

SAVE YOUR KNEES. World-leading certified knee protection.

As a leader in knee protection, we collaborate closely with the best partners in the kneepad industry, such as the British brand D3O®. The innovative D3O® technology provides exceptional impact protection and shock absorption. Louise Wilson from D3O® explains how this works.

“D3O® is a unique technology that enables us to create innovative, active materials that react differently depending on the type of forces they are subjected to. The molecules in the material flow with the movements of the user, but upon shock will lock and stiffen to absorb the energy of the impact. This means that we are able to offer a unique combination of comfort and flexibility with extreme protection when it really counts.”

D3O® technology is used in a wide range of body-protection products. It can be found in everything from clothing and footwear for motorcyclists and extreme sports athletes to PPE for the armed forces and the police.

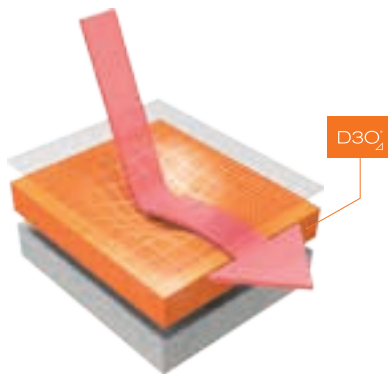

“I think we’ll soon start seeing more solutions in personal protective equipment that are similar to those used for extreme sports, for example when it comes to protecting your head, neck, elbows and hands,” says Louise Wilson from D3O®.

reddot winner 2020

9169 D3O® Ergo Craftsmen Kneepads

The ergonomically shaped D3O® Ergo Craftsmen Kneepad offers advanced knee protection for work that involves frequent kneeling. The kneepad won the Red Dot Design Award in 2020 for “fully satisfying the requirements of safety and comfort”.

Personal protective equipment

CE Personal Protective Equipment (PPE) Regulation (EU) 2016/425.

The overall purpose of the Personal Protective Equipment (PPE) Regulation is to define rules for equipment designed and manufactured to be worn or held by a person for protection against one or more risks to that person's health or safety.

Further information is available from the European Commission at ec.europa.eu

EN 14404 Knee protection.

This standard encompasses the size, force distribution, penetration resistance and usage of kneepads.

Type 2 – integrated knee protection

Work in a kneeling position involves the risk of chronic conditions such as prepatellar bursitis and cartilage injuries caused by continuous pressure on the knees. Knee protection is therefore recommended for all work in a kneeling position. The protection should distribute forces evenly and prevent hard objects on the ground from causing injuries. It is important that knee protectors do not compromise venous drainage in the leg while kneeling or standing up. It must therefore be easy for workers to change position and to stand up to re-establish a normal blood circulation at frequent intervals while wearing knee

protectors. We use Type 2 knee protectors in our products. For this type, the knee protection is integrated with the trousers, which means that wherever you go your knees are always protected. For Type 2 setups, the knee protectors and the trousers are co-certified, ensuring safe and secure protection.

Various levels of protection

Knee protection is also classified in three performance levels. Level 0 includes knee protectors suitable only for use on flat surfaces and providing no protection against penetration. Level 1 and 2 items, however, are suitable for use on both flat and non-flat surfaces in harsher conditions and provide protection against penetration at forces of various degrees.

Instant access to your essentials.

The U4250 AllroundWork Tool Vest from Snickers Workwear provides quick and easy access to all your favorite tools whenever you need them. While retaining all the smart functions of its predecessor, this upgraded version benefits from several new ergonomic features including improved ventilation.

Shoulder straps and belt for ergonomic usage.

The tool vest has a height-adjusting hook and loop fasteners on the shoulder straps to adjust the carrying height of the tool vest to the optimal comfort level. But to really ensure ergonomic and comfortable usage, a lot of focus has been put on the shoulder straps and the belt.

Plenty of pockets.

The vest is made of hardwearing yet extremely comfortable Dobby Pro fabric reinforced with nylon. Featuring plenty of pockets, such as nail and tool pockets, front holster pockets with tool loops, easy-access angled rear holster pockets, breast pockets with a knife fastener and a padded cell phone compartment. All so the tradesmen have easy access to their essentials.

Practical for all seasons.

The tool vest is easy to adjust using a built-in expansion section on the front. This means it can be expanded and worn over a t-shirt, sweatshirt or even the thickest of winter jackets.

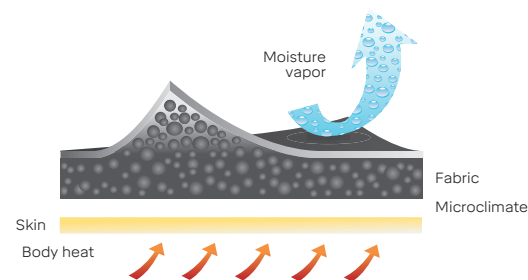

The best materials from the strongest brands.

The right clothing is crucial for a safe and efficient workday. And in order for a garment to function optimally for a specific area of use, it must be made of materials with the right properties. Often several different materials are combined to create the best possible garment. In our quest to design innovative, high-quality workwear, we collaborate with many industry-leading manufacturers of technical fabrics and materials.

37.5®

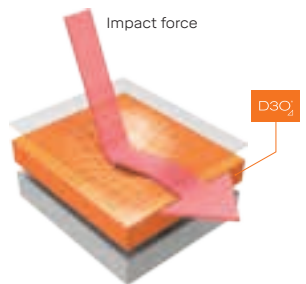

In fabrics with 37.5® technology, patented natural active particles permanently embedded at the fiber level capture and release moisture vapor. Not only do these active particles provide 800% more surface area to the fiber, they also provide a unique driving force to remove moisture vapor from the skin. By actively responding to body heat, the particles use this energy from the body to accelerate the vapor movement and speed up the conversion of liquid to vapor, significantly increasing drying rates. This means the hotter the user gets, the stronger the driving force removing moisture becomes—and the more comfortable the garment remains. 37.5® is a trademark of Cocona, Inc.

D3O®

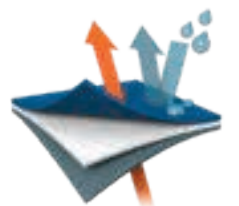

D3O® smart materials specialize in impact protection and shock absorption. Its unique patented polymer composites contains a chemically engineered dilatant as an energy absorber. The material's molecules flow freely in standard conditions, but on impact, they lock together to absorb and disperse energy before instantly returning to their flexible state. This unique characteristic provides enhanced impact protection, while providing versatile and flexible materials that can be manufactured for a host of impact protective applications. Note: D3O® does not "go hard".

Snickers Workwear uses different D3O® material grades specially tuned for a wide range of temperatures that offer enhanced cushioning, long-term comfort and superior impact protection on key contact areas.

GORE-TEX® Garments

GORE-TEX® Technical Garments are extremely durable, waterproof and are guaranteed to keep you dry and comfortable — all day long. The GORE-TEX membrane has over 1.4 billion pores per square cm and the pores are 20,000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapor. This prevents water from penetrating, while it aids your body's natural cooling process by allowing perspiration vapor to escape. Special GORE-SEAM® tape ensures that all seams are durably waterproof.

GRS

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices, and chemical restrictions. The standard helps consumers gain more confidence in recycled content product claims. Learn more at [GlobalRecycled.org](https://www.globalrecycled.org)

OEKO-TEX®

The OEKO-TEX® label indicates the additional benefits of tested safety for skin-friendly clothing and other textiles.

The International OEKO-TEX® Association is an independent test institute, testing textiles for harmful substances according to OEKO-TEX® Standard 100 for textile products of all types which pose no risk whatsoever to health.

REPREVE®

As part of our continuous sustainability work, we have upgraded some of our styles with REPREEVE®, the world's number-one brand of recycled performance fiber. In order to make sustainable claims reliable, the REPREEVE® fabric is verifiable through the U-Trust® Verification program. This means the fiber contains the unique FiberPrint® tracer technology and the fabric is analyzed to validate REPREEVE® content claims and composition.

CORDURA®

An extremely tough and hardwearing material, used to reinforce exposed parts such as pockets, knees and sleeves. It is also water and dirt repellent, easy to care for and retains its shape.

It is a high technology fabric made with air-textured polyamide fibers able to meet the toughest standards of strength and durability. CORDURA® is a trademark of INVISTA Inc.

Washing advice.

Keep clean to satisfy the standard and to increase the products life.

Your workwear and PPE garments must always be clean to be safe and satisfy the standard. Garments covered in dirt will significantly decrease visibility and other properties and may thereby put you in danger. Frequent washing will also help materials last much longer since dust and dirt may destroy fibers by abrasion. A longer life for the product is good for both your finances and the environment. The flame and heat protection in protective clothing made of fabrics with inherent flame resistant properties cannot be washed or worn out. In fact, regular washing ensures that the garments do not contain any dirt or flammable particles that will compromise the protective properties.

Washing machine.

- Read and follow the washing instructions on the garment's care label.
- Make sure to close all zippers, (press) buttons, hook and loop fasteners, etc. and turn the garment inside out before putting it in the washing machine to prevent damage to the fabric.
- When washing garments with reflective details (reflective stripes etc.), you should always wash the garments inside out. The reflectivity of any reflective material will be reduced every time garments are washed without being turned inside out. Note that damage to the flame-retardant, visibility or reflective properties of the material may not be visible to the naked eye.
- Fill the washing machine to reduce

the number of washing cycles.

Detergents.

- Use organic detergent that is friendly to the environment and your skin to prevent skin irritation.
- Use special wool detergent for woollen garments.
- Do not use more detergent than necessary in order to protect the environment and the fabrics and to avoid lumps of detergent on your clothes.
- Do not use softener, as it may reduce the performance of the fabric as well as contain many hazardous chemicals that are not always listed on the label.
- Softener and soap-based detergents should always be avoided when washing PPE garments as they leave traces of either fat/grease from soap or chemicals that could counteract the properties of the fabrics.

Temperature.

If the clothes are only slightly dirty, use lower temperatures in order to save energy and protect the fabrics. Washing at 104 degrees instead of 140 degrees saves almost 50 percent energy.

Drying.

- Insofar as is possible, dry outside in the air or on a drying rack. However, certain garments must be tumble dried at a high temperature to retain their properties — read the label carefully.
- When using a dryer, do not use a higher temperature than necessary in order to save energy, avoid shrinkage and protect the fabrics.
- Do not let the garments stay in the washing machine after washing, hang

them on a drying rack immediately in order to prevent creases.

Materials.

- To protect fabrics, reflective tapes and prints, turn the garments inside out before washing them.
- Wool is a natural product that can keep itself clean; it does not need to be washed as often as cotton or man-made materials.

Never mix certified and non-certified garments.

You should never mix certified garments with non-certified garments in the same wash, since non-certified garments may bleed colors and/or chemicals that will damage the certified garments.

Damaged garments.

If the garment has been exposed to chemicals or heat/flame, it must be carefully examined to make sure that the fabric is undamaged. If a certified garment needs to be repaired, you must only use approved/certified materials and fabrics.

Symbols Key.

These symbols will help you find the right garment. They are used as guides in the product descriptions contained in this brochure. The following definitions apply:

	Handwash		No Bleach		Do not iron		Dry cleaning
	Maximum washing temp. 40°C		Do not tumble dry		Iron at maximum 110°C		4-way stretch
	Maximum washing temp. 60°C		Tumble drying normal temp		Do not dry clean		Reg design

Measure right — for a good fit.

Carefully follow our measuring tips below to make sure you get the right size. Snickers Workwear keeps all standard sizes in stock for speedy deliveries (see specific garment for the standard size range).

Important measurement tips.

- 1. Get help from someone to take your measurements.
- 2. Take measurements dressed in body-tight underwear.
- 3. Measure tight against/around your body, but without the measuring tape being pulled so hard that it “cuts” in.
- 4. When measuring the inside leg, make sure the measuring tape is firmly extended.

A. Body length.

Top of the head to the sole of the foot

B. Chest.

Chest width, horizontally at the widest place.

C. Waist.

For One-Piece Pants, Overalls and Jackets.
Waist width horizontally at navel height.

D. Lower waist.

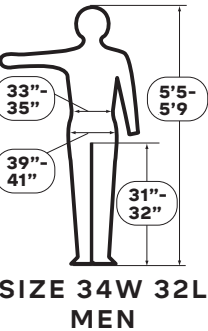

For Pants.
Lower waist width at the place you wear your pants.

E. Seat.

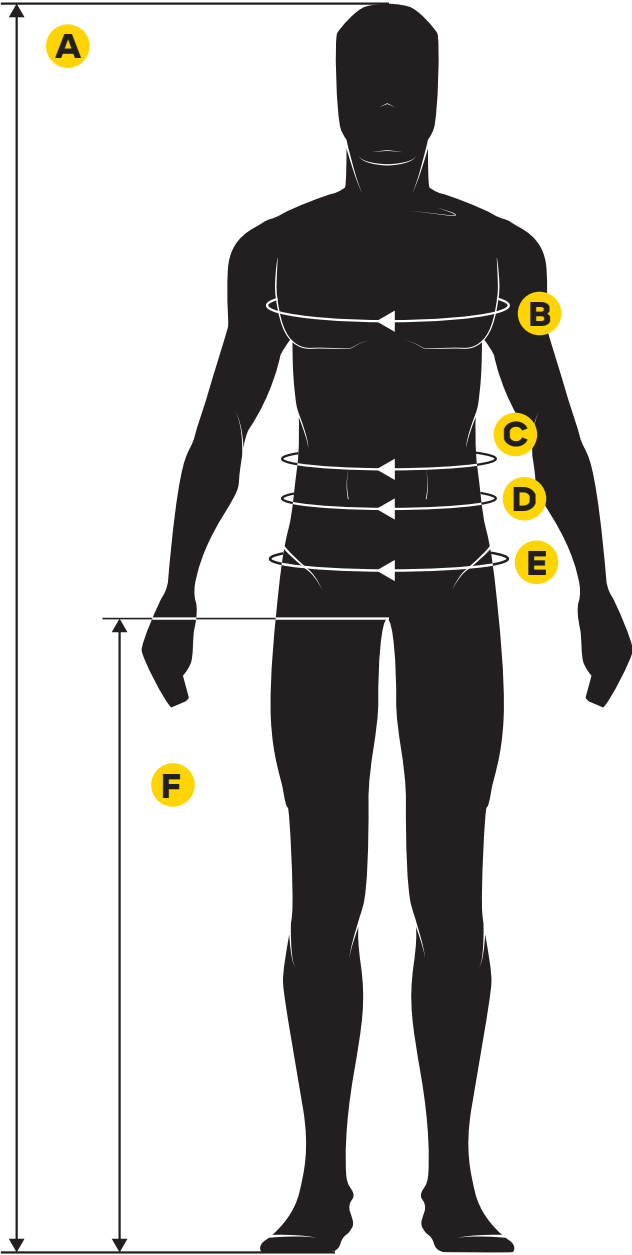

Seat width, horizontally at the widest place.

F. Inside leg.

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

Every CE-marked garment has to have a label with a pictogram that shows the size and the body measurements of the person that the garment is intended for. This means that you always can check inside the garment to see the size.

Getting the right size.

- 1. Choose the right size chart below:
6XXX for 6-series pants
- 2. Look for your body measurements in the chart and choose the corresponding size.
- 3. To ensure an optimal fit — try them on for real!

All measurements are body measurements.

A unique product family

HULTAFORS **GROUP** offers a dynamic range of premium brands to rely on – for distributors and tradesmen alike. Each brand within the Group is united with a common passion: to keep trade professionals at the forefront in terms of functionality, safety, protection and overall productivity.

Hultafors Groups is proud to present fourteen leading brands that together offer a unique product family for professional tradesmen.

Each brand represents expertise in its particular area and brings unparalleled knowledge and insight into the unique on-the-job challenges encountered by tradesmen. This makes it possible for us to meet, even anticipate, evolving demands by designing innovative state-of-the-art products that make the tradesmen workday safer, easier and more productive.

Excelling in brand-driven product categories within the industry and construction equipment sectors, we offer customers and users a best-in-class experience. And by using our high-value products as well as benefitting from brands built around their needs, tradesmen can be at the forefront every day and take great pride in their work.
