

Dakota Well Water

Tutorial for Well Water Testing

Step 1 : Obtain Dakota Well Water Test Kit

Dakota Well Water test kits can be ordered online from our website at <https://www.dakotawellwater.com>.

Water test kits may also be obtained from participating Fleet Farm stores or from your local county extension service office.

Step 2 : Fill Well Water Sample Tube and Seal It

Fill the supplied sample tube from your faucet and seal it with the provided cap.

Step 3 : Apply Label To Well Water Sample Tube

Fill out your name, phone number, and email address on the provided **BLUE** sample label and apply that label to the well water sample tube.

Step 4 : Submit Payment Online

You can submit payment for your well water test online at <https://www.dakotawellwater.com/payment>. A receipt will be emailed or texted to you, depending on which option you indicate.

Step 5 : Package Tube in Supplied Shipping Box

- Wrap the well water sample tube in the supply styrofoam packaging and secure it with the supplied tape
- .Place your well water sample tube in it's styrofoam packaging in the supplied shipping box
- Fill out the **RED** mailing label with all requested information, and place that label on your shipping box.

Step 6 : Ship Box Via UPS

Ship your well water test sample box via UPS.

Step 7 : Receiving Well Water Test Results Notification

You will receive all necessary information you need to access your well water test results online.

You should receive this result information within 7 days after submitting your well water sample. If you do not, please contact our office at 701-220-9142.

Thank you for entrusting Dakota Well Water to ensure the safety of your drinking water.
