

Is this the best Marcus Rashford? Or is the best yet to come?

The blow up of Rashford's form post-World Cup has been astounding. But what changed, and can he keep it going?

Scoring 10 goals and gaining 2 assists in all competitions since the world cup, Rashford's regain of form since the World Cup has been staggering. Many factors have to be assessed when looking at why this form is happening:

A clinical World Cup

Prior to being picked in Gareth Southgate's World Cup squad, Rashford was in a dry patch of form. Many doubted his inclusion. But he found his feet against Wales by scoring 2 to inspire England, en route out of the group stages in Qatar.

The Ten Hag effect

It can not be understated the influence that Erik ten Hag has had on the squad at United. But no one has experienced growth quite like Rashford. He has grown in confidence this season thanks to the permanent backing of his manager, and ten Hag needs huge credit for it.

Playmakers

In previous years, creative players for United have been at a surplus. This team however is flourishing with them. The likes of Fernandes, Erikson, Casemiro and even Shaw have helped Rashford get back to his best and scoring goals for United.
