

# Kids Have No Interest in Studies! How to Teach Your Child?\_MyPrivateTutor Qatar

**Meta-title:** Encouraging Your Child to Develop a Love of Learning

**Meta-description:** In this article, we'll offer tips and strategies for encouraging your child to develop a positive attitude toward studies and learn to enjoy the process of learning

## Introduction

Children should be interested in learning

### [Source](#)

Are you struggling to motivate your child and engage in their studies? It can be challenging to help kids find a love of learning, but it's not impossible. Every parent wants their child to do well in life. Excelling in academics is important, and here are the ways that children can develop an interest in studies.

## 7 ways to develop study interest in your children

### 1. Engage with kids

Research has shown that kids lose interest in a task when there is no engagement. If the kids see others enjoying other activities like browsing on their phones or watching TV, they get bored of studying and disconnect. To build that connection, parents need to engage with kids while they are studying. You can also use the help of home tutors for kids in Dubai or near you. Here are some useful tips to follow to engage with your kids.

- Show them the good methods of studying by doing it yourself with them.
- Read with the kids during their reading time.
- Read aloud to your kids.

## **2. Make it enjoyable**

Boredom affects learning outcomes.

[Source](#)

Boredom is another prevalent reason for kids' disregard for studies. Kids are biologically more in sync with their creative and artistic sides. It is a good idea to make use of their instincts to get them interested in their studies. Incorporate a musical element while they are studying to keep them engaged.

- Incorporate games while teaching them. For example, instead of using an old-style quiz, use a game to revise with them.
- Use mnemonics for concepts that your kids find hard to study.
- Let them play games on education websites to practice English grammar or math problems.

### **3. Explore their interest**

Forcing kids to read something they have no interest in often leads to apathy. Read the following pointers to understand how to explore your child's interests. Once you have a fair idea of their interests, engage them further using these subjects.

- Get them different books on different subjects. Let them choose the reading material based on their liking.
- Take professional help to identify their learning style.
- Spend time reading different subjects. By doing so you understand their areas of interest.
- Ask them questions about what they find interesting. You can then, bring them new materials from their areas of interest.

### **4. Connect with emotions**

Emotional well-being is another significant factor in learning. Understand their emotional needs to help them with their studies. A lot of parents use studying to scare their children. If they do something bad, parents intimidate them with the threat of making them study. This forms a negative perception of studying in kids' heads.

- Accept their interest or disinterest in an area or subject without passing judgment.
- Do not chide them for asking a lot of questions about a difficult subject.
- Talk to them in a neutral environment to understand what motivates them to study.
- Share your own experience with academics to help them feel comfortable.

### **5. Empower them**

Better resources equal better learning.

#### [Source](#)

A lot of kids are unable along with to concentrate on their studies. This is because they don't have appropriate resources to help them study. Along with materialistic resources, work on their cognitive skills and abilities to help them study better.

- Give them access to all the resources that they need to study well.
- Let them take their own decisions.
- Remove all other distractors around them like phones or TV or games.

## **6. Offer encouragement**

Kids have short attention spans. They need constant encouragement to do something regularly. Support your kids' learning by rewarding them for their achievements. Children develop the concept of cause and effect over time.

Show your kids the consequence of not studying. Knowing about the consequence of not studying forms a part of encouragement.

- List clear goals for your kids so they understand what they are working on.
- Understand what your child wants as a reward. Gift them that instead of giving them things that you think are appropriate for them.

## **7. Create an everyday routine**

Discipline is important to maintain interest in any activity for a long time. Having a routine would help them in better learning. Keep in mind the following things while working with your kids to build and continue a routine:

- Let your child take the lead in creating a routine.
- Keep flexible activities in the routine. For example, instead of saying read one chapter of science, keep Read Science or Read one chapter.
- Set an example by making a schedule for yourselves with your child.

## Final Thoughts

Communicating with your kids is the best way to develop their academic interests. As parents, it can be challenging to see your kids' faltering interest in studies. But you are the most important resource to help them overcome their struggle and study regularly. You can also take help from home tutors to give them more exposure.
