SPONSORS:

Lumii Design was founded in the autumn of 2021, born from the disruption and reflection that followed the pandemic — a time that shook the commercial interiors industry to its core and reshaped how we think about space, sound, and sustainability.

The company began when Julian, a seasoned figure in commercial interiors, crossed paths with Bonny and Ian while working on various workplace and architectural projects. Despite their different backgrounds, they shared a common vision: to create acoustic solutions that not only perform but inspire. Together with Tom, Julian's long-time right-hand man (and son), the four co-founders combined their strengths in design, manufacturing, and innovation to form Lumii — a new kind of acoustic design studio.

Based on a peaceful, solar-powered working farm in East Sussex, Lumii's home houses our design studio, warehouse, and production hall under one roof. This unique setup enables us to work collaboratively and efficiently — designing, prototyping, and producing everything in-house.
