## Upgrade to Blue Pill

See the future of media production control

**SKAARHOJ**

I've had a chance to connect with an unbelievable amount of companies and researchers.

*Ryan Olsen, Regional Sales Manager*

**skaarhoj** • Follow

**skaarhoj** Thinking about ways to upgrade your current controller? Try Blue Pill. The new web GUI is easier to use and upgrade without connecting to the SKAARHOJ server. Integrate with 111 cameras and counting! 📹📹

No need to buy a new controller. Just add Blue Pill to existing UniSketch products.

Find out how by following the link in our bio 📌

**ushioamerica** Back in April, we awarded the first NUA! Presidents Award to Ryan Olsen. Anyone who works with him knows the dedication and knowledge he brings to educating customers (and even fellow employees) about Ushio products. In addition to Horticulture and other UV products Ryan has been working with the Care222 lamp line. He says, "I've had a chance to connect with an unbelievable amount of companies and researchers...It's been extremely motivating to know that our products will have an impact in helping to mitigate an event like this in the future."

Before coming to Ushio in 2014 he worked in horticulture retail, on a small family farm and, before attending college, a surf shop. Ryan has a passion for surfing and enjoys getting out on the water after long week.
