

ALL YOU NEED TO KNOW

The specialists at BayCare Clinic Neurological Surgeons work collaboratively to offer comprehensive care for conditions affecting the brain, spine and nerves.

We are the longest-practicing neurological surgery team in the region, with a combined 120 years of experience.

In addition, we were the first neurosurgery team in the region to offer minimally-invasive spinal fusions and artificial disc replacements.

"It's awesome. It's beyond words – amazing – when you don't have to wake up in extreme pain every single day."

- Patient testimonial

Our team consistently seeks new and innovative solutions to better serve patients. That means we employ the most effective, evidence-based strategies to deliver increasingly positive clinical outcomes and overall patient satisfaction. We work to ensure that our processes remain easy for referrers to access us for top-notch, specialized patient care.

The providers at BayCare Clinic Neurological Surgeons treat these and many other conditions:

- Back pain
- Neck pain
- Trauma, stroke or aneurysm
- Disc herniations, spinal stenosis and spinal instability
- Spinal injuries and fractures

"I feel like I got my life back. There's nothing that stops me from living life at all now ... It was an excellent experience for both surgeries and I just feel like I'm good to go for any kind of activity."

- Patient testimonial

We also encourage and offer second opinions for a variety of conditions. As a result, patients can determine the best course of action by obtaining an additional opinion regarding a diagnosis and treatment plan.

Patients seeing BayCare Clinic Neurological Surgeons for the first time must have a referral. The primary care physician, chiropractor or other medical provider will send that referral to

our office. To guarantee that the patient receives the best care possible, our team fosters a collaborative relationship with the referrer. Our staff will contact each patient to schedule his or her first appointment.

Our [referral system](#) creates a smooth, seamless pathway for you to connect with our providers on your patient's behalf. A simple registration is required, but the site is secure, allowing you to upload medical information and send images (such as X-rays) without worry. Once registered, you will only need to enter your username and password the next time you visit the site.

Patients who require specialized care for their chronic or acute back, neck, or spinal conditions can trust the expertise of our neurological surgeons.

"When I got out of recovery and they got me up to walk, I looked at my husband and was like 'I'm pain free,' It was just amazing that the pain was gone."

- Patient testimonial

BayCare Clinic is proud to partner with the Wisconsin Chiropractic Association and more than 100 chiropractors in northeastern Wisconsin to provide top-level musculoskeletal care to their shared patients.

Dr. Jack Leschke, neurological surgeon, works collaboratively to treat a variety of back and neck conditions.
