Most consider the bedroom (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>) as their home's oasis or at least want them to be. However, to create this a special escape from the daily grind takes a bit of cleverness. Gratefully, to give the bedroom a unique look doesn't have to break the bank. If you're looking into how to design your bedroom wall, here's a jumping off point to get you started.

If you're like the average adult and get eight hours a day of sleep, that means if you live to be 75, you will have spent 9,125 days in your bedroom or other sleeping quarters (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>). Since we spend so much time in the bedroom, why not make it a special retreat? Perhaps, you like to enjoy the bedroom for more than sleep, such as reading, watching TV, or even a bit of romance. There are many activity you desire.

## Artsy Treatment

A newer trend in decorating, the triptych-style layout is perfect to have a contemporary and clever look to your bedroom. Take one of our gorgeous skyline murals (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>) and apply to 3 canvas panels to give your bedroom a dramatic and artistic accent wall. With the right dramatic photo, your walls won't need any more additions to make a bold statement.

## Wooden Trim

Another inexpensive yet elegant treatment for your bedroom walls is crown molding. Pay attention to your wallpaper or wall mural design to give you inspiration for what type of trim to use. Create a frame or set of frames (remember triptych?) and paint them a white or bright color to add emphasis to a painted wall, or

frame special parts of your wall mural. You could also take a piece of fabric or wallpaper and apply to that wall. Then add your crown molding frames to give the illusion of framed artwork.

Or go a step further and add wooden appliques inside the crown molding frames. This just further adds a dash of class to your bedroom décor. If you want to completely indulge in wooden accents, add some wooden corbels as the top edges of your accent wall to add a touch of finesse to your bedroom (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>).

## Painting is Not Just for Picasso

Decorative painting techniques can also give some life to a plain painted wall or help tie together your wall mural (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>). Take our skyline (<https://www.limitlesswalls.com/wall-murals/collections/city-skyline/new-york-city.html>) picture again. If you have a nighttime or dusk wall mural, try stenciling blocks of squares in complementary colors to give the illusion of additional buildings at night. You don't have to be an artist to use stencils; just a steady hand and the desire to create.

Or take that painted accent wall and distress it with some finer grit sandpaper on the edges or where it would look like natural wear and tear could occur. This distressed look gives some warmth and a lived-in look to make your bedroom cozy.

There are several easy ways to add texture and depth to your bedroom walls. Sponging can be done by either applying several layers of paint giving your walls a subtle pattern of color, or for more contrast use 2 or more colors in sponging. Ragging or rag-rolling gives your walls a completely different texture by pressing a dampened, crumpled cloth across the wall. Rag-rolling is similar but instead of randomly crumpling your cloth, roll it into a tube shape then roll it along the surface of your wall. Stippling is yet another way to add subtle color and texture by using a special stippling brush and pressing it into the wall. With all of these techniques, you will need to rinse your chosen applicator often to achieve the best pattern and texture.

## Spotlight on the Bedroom

So, you have one of our gorgeous wall murals (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>) in your bedroom but simply don't know how to design the other bedroom walls around it. Make a bold, "look at me" statement with your mural by adding some accent lighting. Adding a few circular recessed lights or even some track lighting to shine down on your artistic purchase not only showcases its beauty but adds some intimate warmth to the room. Lighting is one of the simplest ways to create a centerpiece for your bedroom without out having an artistic bone in your body.

## Your Own Art Gallery

Maybe you chose a patterned wallpaper (<https://www.limitlesswalls.com/wall-murals/collections/wallpaper.html>) from Limitless Walls. Why not create a collage-like effect with pictures of family, friends, or even vacation photos and place them in random styles of frames? If you have a young

artist in the home, move some of their cute creations from the refrigerator and frame them for your bedroom (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>). Arrange your pictures in random patterns to show off your own family art gallery or your budding little artist's work.

## Reclaim that Wood

Whether you're Eco-conscious or just love the rustic look, an accent wall made from reclaimed wood (a barn perhaps) or old pallets can add some charm and a unique style to your country-style (<https://www.limitlesswalls.com/country-mill-wall-mural.html>) wall mural. You can either leave reclaimed wood as-is or hang some nostalgic antique road signs for a rustic retro look to your

## Two Murals for a Bold Look

Why use just one wall mural? Take a bold pattern from one of our designers (<https://www.limitlesswalls.com/wall-murals/collections/designers.html>) as the main wall design. Then accent this by a smaller, dramatic scene to set the tone for a daring and exciting statement. Or go for a

subtle pattern on the main wall then apply a smaller mural to canvas for an eye-catching and distinctive statement in your bedroom (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>).

## Tile Isn't Just for the Bathroom

Using the same idea of a photomontage, take several random patterns or styles of tile and arrange them on an accent wall using complimentary colors from your wall mural (<https://www.limitlesswalls.com/wall-murals/rooms/residential/bedroom.html>). If that's too busy or work intensive, take one pattern and use it as a special chair rail on a boldly painted wall to tie in your bedroom décor. You could even do similar things with the tile by using it on only half the wall. Using tile gives a stimulating, textural experience for both the eye and touch sure to delight yourself and family.
