

Empowering Women: Get involved in the Women's Network

March 8th is International Women's Day, and what better time to tell you about the **Women's Network (WN)**.

The WN, which is run by a team of highly motivated female leaders, provides guidance and support to other women through education, networking, coaching, and mentoring. Their mission is simple: drive improved company performance through increased development and engagement of female talent.

Throughout the year WN hosts a variety of unique and engaging events focused on relevant industry and career- focused topics. The latest, an interactive speed networking event, was held in December and attendees got the chance to connect with over 20 female and male executives. Discussions were candid and ranged from career advice to industry insight, to the year ahead.

There are many **upcoming WN events** including the Speaker Series, golf networking tournament, and events put on by our partners at Rotman, Canadian Women in Communications, Catalyst, Women's Executive Network, Canadian Women's Foundation and more.

Want to get involved?

To learn more about the WN and upcoming events, or to get involved, [click here](#) to access the WN site. We look forward to seeing you!
