

Everything you need to

WORK with wood

With access to timber, you can hand-select the perfect wood species and material for your woodworking project. With a Wood-Mizer **personal sawmill** and their professional workshop range of **planer/moulders**, woodworkers **saw logs into any custom sized boards** and finish them in to flooring, crown moulding, cabinet trim, furniture components, and more. With Wood-Mizer's line of sawmills and wood processing machines, you can take **full creative control of your project from Forest to Final Form.**®

LT15 WIDE SAWMILL

- up to 0.88m³ /hr
- 910mm x 5.4mm
- 18.6kW petrol (upgrades available)
- Manual crank feed
- Optional power feed

MP260 PLANER | MOULDER

- 260mm x 100mm
- Large 4-sided cutting capacity
- 4-sided planing/profiling in one pass
- Easy-to-change Knife Profiles

"Having our own Wood-Mizer LT15 sawmill gives us an advantage as we can select matching boards for individual jobs. I remember making blackwood furniture for a whole house. It came from one log and the color matched beautifully."
