Table of Contents

Introduction 1
Online vs. Printed Modules Distance Learning 2
Advantages of Distance Learning *2*
Disadvantages of Distance Learning *2*
Factors that differentiate online and printed module learning: *2*
I. Location 3
II. Interaction 3
III. Intention 4
Transitioning from Face-to-Face to Distance Learning *5*
Actual Learning Transition *5*
Distance Learning Through Printed Modules *7*
Competency-based Education (CBE) *8*
CBE Guidelines: 8
Managing Transition 10
How can a teacher cope with this transition? *10*
Simplicity 10
Prioritize Student-Driven Assignments 11
Game-Changing Touchpoints 11
Be Available 12
How can parents cope with this transition? *12*
How can students cope with this transition? *13*
Create a study Space 13
Ask questions 13
Make a plan 13
Be independent 13

Using Printed Materials in Distance Learning 14
Characteristics of Module Learning *15*
Components of a Module *15*
What Teachers Need to Do *16*
Most Essential Learning Competencies (MELC) 17
References 18

Introduction

Since the pandemic disease Covid-19 is currently uncontrollable by the country, face-to-face learning will not be an option at this time. Hence, the Philippines is now taking a big step in adopting an alternative learning option under 'new normal,' which is distance learning. The transition may not be easy for students, teachers, and even parents, but the proposed learning options may lighten the worry if you fully understand how they work.

The Department of Education has chosen alternative modalities that parents and educational institutions can decide on which to employ. The first modality is for students to access their classes through online distance learning. However, since not all students have access to the internet and have computers or laptops, other means such as printed modules, and broadcast media are also considerable.

In this book, we will be talking about the use of the Printed Modules as Distance Learning Option. This e-book divides into chapters which explain:

- the difference between online and printed modules distance learning;
- how teachers, parents, and students can cope with the transition; and
- things that teachers need to consider when doing modules and how they can be used effectively in distance learning.
