

T T-MOBILE
FOR EDUCATION

YOUR TECHNOLOGY PARTNER FOR POWERING SAFE, SECURE, AND RESILIENT EDUCATION SUCCESS.

San Diego Unified School District educators recognize the diverse needs of students and the importance of establishing safe and flexible learning environments that accommodate individual differences, abilities, and learning styles.

Knowledgeable and skillful instructors can create rich learning experiences, empowering students to become problem-solving innovators. T-Mobile for Education can be your strategic partner to help accelerate and actualize your vision.

Enabling student success in an increasingly digital world.

The K-12 classroom of the future holds significant promise to drive student success and school impact by improving engagement, achievement, and workforce readiness. With highly connected digital communities and ecosystems, supported by the Internet of Things (IoT), artificial intelligence (AI), and augmented and virtual reality (AR/VR), learning can be transformative for students, teachers, and administrators.

San Diego Unified School District might face challenges as it builds the classroom of the future. Learning can be hindered by budgetary constraints and complex, disjointed technologies. Increasing digitization also means exposure to cyber threats and pressure on schools to demonstrate that digital tools are delivering on their investment.

The ability to address broader issues, such as teacher churn, connecting communications between all educational stakeholders, measuring student performance, and creating safer schools are also essential components to enable student success and school impact.

T-Mobile for Education leaders know that there is no one-size-fits-all approach and the needs of San Diego Unified School District's communities are distinct. Our innovative education technology enables relevant, tailored, and safe learning experiences both on and off campus. We power the tools to lead, monitor, and support student performance and progress, lighten the workload burden on faculty, and improve communication between students, parents, and educators.

Our commitment to delivering to your specific requirements means that together, we can bridge the digital divide, empower students and teachers, and create safer environments for more dynamic, engaging learning that can happen virtually everywhere.

CONNECTIVITY UNLEASHES MODERN EDUCATION: T-MOBILE MAKES THAT CONNECTIVITY POSSIBLE

Built on the backbone of America's largest and fastest 5G network¹, we can equip San Diego Unified School District with engaging learning environments.

Our visionary approach to connectivity in education means we can enhance learning and teaching by leveraging cutting-edge technology and real-world experience. As your partner for driving long-term and ongoing engagement and achievement, we can support San Diego Unified School District with:

Connectivity and accessibility to establish a foundation for hybrid learning.

We help create a level playing field for students by providing access to materials and platforms from virtually anywhere. We enable the use of integrated digital teaching tools that create enriched and engaging curricula. We can also support IT teams with the infrastructure to deploy and manage digital learning tools and resources.

The tools, technologies, and access to achieve 21st-century digital preparedness.

We help equip students with the capabilities to develop digital literacy and provide access to personalized learning. We also help teachers provide comprehensive, differentiated instruction to meet each student's needs. Our partnership can champion digital learning needs.

The ability to create data-driven learning environments to inform decisions and create clearer, more predictable educational outcomes.

By delivering targeted support and personalized feedback for student wellbeing and initiating appropriate interventions, we empower schools to improve learning outcomes. With access to detailed real-time analytics, educators can also develop informed instructional strategies and monitor progress, attendance, and engagement. We can also support IT teams by increasing their ability to integrate and visualize data, improving their responsiveness to teacher and student needs.

Improved access to educational metrics, academic performance, and achievements.

With increased and continuous access to more engaging and productive learning environments, we can help encourage improved attendance and increase student success. At the same time, we can provide the technology solutions used to lead, monitor, and track education and demonstrate the impact of IT's value in achieving educational goals.

Empowering educators with unified and resilient learning experiences, regardless of external challenges or disruptions.

We can provide students with consistent and secure access to educational resources while enabling educators to deliver flexible teaching instruction that can adapt to different scenarios and student needs. By leveraging the most consistent network in America², T-Mobile can also support IT with the ability to provide agile and continuous learning delivery for teachers and schools as a whole—even under extreme circumstances like Wi-Fi outages from natural disasters.

Enhanced safety and security—on campus and online.

Using our 5G network to power IoT and AI-enabled tools, we help create safer physical environments through smart cameras, access control, and emergency response systems. Our state-of-the-art cybersecurity solutions ensure personal data is protected, too. This allows educators to concentrate on teaching and students to focus on learning, knowing that security measures are in place and that digital tools won't compromise their data.

A long-term partnership and commitment to driving education success—for everyone.

T-Mobile for Education delivers bandwidth but also works in depth with you to understand San Diego Unified School District's pain points and the broader needs of your students, educators, and communities. We're different because:

We tailor our solutions to meet the precise needs of your schools and students.

We're forward-thinking collaborators uniquely positioned to become part of your team to create tailor-made solutions for your school's specific needs—all to inspire innovation and empower success.

We're not followers. We're 5G visionaries who lead technology trends in education.

We're innovators and trailblazers in the 5G space, who operate way ahead of our competition. This allows us to provide ultra-fast and highly secure connectivity that enhances learning experiences while simultaneously keeping students safe in real time.

We bring a high pedigree of education expertise with first-hand experience as educators.

Our team consists of lifelong educators with significant experience in and understanding of education. Because of this knowledgebase, our services and solutions are grounded in proven, practical implementations. We also have an eye on the future and research what students will need to learn in coming years to ensure an education suited to the 21st century and beyond.

We have a decades-long history of philanthropic commitment.

For example, in 2020 we launched Project 10Million to help give students of all backgrounds a brighter future. Through this program, we provide millions of underserved students across the U.S. with free hotspots equipped with education-grade content filters that establish safe and reliable connectivity for all. We've also donated \$500k to create scholarships for students attending Historically Black colleges and universities.

We have trusted partnerships with notable school districts and government institutions.

T-Mobile supports critical infrastructure and ensure the continuity of delivery for education and government services. This includes providing services and solutions to Oakland School District, Dallas Independent School District, City of Chicago School District, Miami-Dade County Public Schools, the IRS, Veterans Affairs, the U.S. Navy, and the United States Postal Service.

Our 5G network is the largest and fastest³ in America.

We are America's leader in 5G coverage and speed so our products and services are designed for unlimited use, allowing school districts of all sizes—from both urban and rural areas—to budget and use funding dollars efficiently, with no surprises.
