The Experts Behind BONE

BONE was founded by physicians to meet the growing regional demand for specialized bioskills labs that are designed around your needs. As New England's largest multi-use medical training facility, BONE is staffed by experienced professionals who specialize in providing you with the best possible outcomes. As your valued testing and training partner, we'll ensure the complete coordination and overwhelming success of your next event, from start to finish.

Alexander Kouspakian
Chief Executive Officer

"It is always our goal at BONE to build partnerships with the medical device companies, surgeons and community organizations who entrust us with their events and trainings. Your company isn't just another client to us. We ensure that you have the materials, equipment and lab space you need to enhance your skills, ready your device for market, get trained or train your team."

Victor M. Machado, Jr.
