## Elevate Your Teams Skills

As a medical device company, any specialty testing facilities used by your organization need to be able to ensure test accuracy, reliability, reproducibility and compliance with FDA requirements. Your testing labs must adhere to the highest standards of quality and safety and have the capability of identifying potential issues to prevent recalls or liabilities and help get your solutions to market quickly and safely in less time with fewer hassles and reduced costs.

## Committed To Your Success

As an active member of the Massachusetts Medical Device Industry Councils (MassMEDIC), Bioskills of the North East fully supports your product research and development efforts with a 20,000 sq. ft. testing and training facility specially equipped for your unique educational needs. BONE was created to expand your access to the specialized facilities you need for device testing including didactic trainings, wet lab space and dry labs.

The center was developed to provide medical device companies with everything needed for the highest quality experience at a price that won't break your budget or disrupt your timeline. BONE offers cutting-edge technologies including human anatomy and tissue specimen sourcing and storage.

As your preferred facility partner, BONE helps bring order to the unpredictability of research and development. The on-site team is available to assist you with everything you need for a successful testing or training event including specialty setup, securing biospecimens and complying with changing regulatory requirements. Ensure your long-term success by partnering with the industry-leading team at BONE.

PREPARE FOR EXCEPTIONAL OUTCOMES

## Leverage the Benefits of BONE

### Medical Alliances

Established partnerships with medical device companies

### Expert Assurance

Experienced professionals ensure the best outcome for your team

### Quality Excellence

Delivering exceptional quality and value

### Supportive Service

Full service and support from a fully trained team

"The facility is awesome, and your staff was great. Anything we needed, they were all over it. All in all, it was top-notch."

D. Grava, Sr. Regional Sales Director
