

GEAR UP WITH PREMIUM GOLF GLOVES DESIGNED FOR ATHLETES, BY ATHLETES

Improve your grip and performance on the course just as you would at the plate with Philip Isaac's high-performance golf gloves featuring Ride-N-Dri™ technology. Inspired by the batting gloves worn by the pros, PI's inaugural glove collection offers fit, control, and durability in a wide range of color options.

Experience an exceptional grip, less club slippage, flexibility, and enhanced breathability with PI's precision-crafted gloves. The integrated N52 magnet on the hook-and-loop tab closure is key to PI's Ride-N-Dri™ technology.

TWO ATHLETES, ONE VISION: TO HELP GOLFERS EVERYWHERE IMPROVE THEIR GAME WITH A GOLFING GLOVE THAT MERGES THE BEST ELEMENTS OF THE BATTING GLOVES THEY USED WHEN THEY PLAYED PROFESSIONAL BASEBALL WITH A GLOVE DESIGNED SPECIFICALLY FOR GOLFERS.

RIDE-N-DRI™ TECHNOLOGY

Available exclusively with Philip Isaac Gloves, Ride-N-Dri™ technology allows you to easily dry your gloves during your golf game. An integrated N52 magnet on the hook-and-loop tab closure on the back of your hand is the key to this game-changing innovation. The highest-grade rare earth magnet available, the N52 is powerfully strong.

Attach your glove to your club, your golf bag or your golf cart as you travel between holes. A laser-etched coin ball marker is the finishing touch to your PI glove. Store the lightweight ball marker on your glove for convenience and a chic touch. Simply slip the marker off the magnet to mark your position on the green.

HOW TO USE RIDE-N-DRI™ TECHNOLOGY

For best performance, simply slip the ball marker off your glove and attach the outside of the magnet to any ferromagnetic surface. (The external magnet will adhere more effectively than the Velcro side.) As the wind flows through your glove, it will quickly and thoroughly dry it out, letting you continue playing your best.
