Tailored to Your Training and Conference Needs

Need a private OR suite? Or a large configurable space? In our 20,000 sq. ft. facility we can accommodate groups of any size with multiple labs, soundproof auditorium, conference rooms or multi-purpose areas. Our customizable rooms can be changed to meet your specific needs.

Train Your Medical Device Sales Team

You need to ensure that any facility your medical device sales team uses for testing and training can guarantee the accuracy, reliability and reproducibility of research and development done onsite. At BONE, we deliver a hands-on experience for your team with fully equipped specialty laboratories to assist with FDA testing compliance, a private OR suite, live streaming capabilities, and more to ensure test accuracy, reliability and reproducibility for faster time-to-market.

Ensure Operational Preparedness

As an educator or trainer, you can provide your nurses and other clinical staff with access to a realistic simulation experience for high-quality, real-world skills development. Use scenario-based training opportunities developed specifically for simulation audiences including curriculum, faculty development and technical resources for a comprehensive education training program.

Improve Patient Care

As a local company with strong roots in our community, BONE offers EMS and nursing education to local and regional audiences. Through high-quality, cost-effective education, EMS and nursing students strengthen and enhance their skills, building a solid medical foundation, enhancing their critical thinking skills and their patient care abilities.

"Victor and the team have created a fantastic venue to handle any kind of training, product development or surgical marketing activities. Great for large or small groups and the ability to film with a boom camera is a plus if you want to create educational or surgical instructional video. The staff is responsive and access to and from the highway is quick and easy."

Lester Fehr, Orthopedic Program Director at Primo Medical Group
