

# Have an entrepreneurial spirit? Find your passion through ASU Online's Technological Entrepreneurship and Management degree

23 March 2015 by [Jenny Lane](#) in [Community Discussion](#) - [No Comments](#)

From 2005 to 2013, ASU has supported 298 startups, and enabling our students to pursue their entrepreneurial spirit is greatly important to us. In fact, our Bachelor of Science in Technological Entrepreneurship and Management degree program offers a foundation in technology-based innovation with an emphasis on leadership, entrepreneurship and management fundamentals, preparing students to follow their dreams and start their own company after graduation.

If you have an entrepreneurial spirit and a passion to start your own business, the program's focus on project leadership and process innovation and development may be right for you. Students in the program have the opportunity to learn the fundamentals on starting, financing and operating businesses and nonprofit organizations, arming them with the skills necessary to thrive in the today's business world.

The program mirrors real world work environments, as students work both individually and collaboratively in virtual project teams to develop products and solve technical challenges. Through coursework and projects in product development, consumer behavior, process innovation, management and entrepreneurship, students gain the necessary skill sets to be an entrepreneur.

If this sounds right for you and you are interested in learning more about the Bachelor of Science in Technological Entrepreneurship and Management, click [here](#).
