THINK BU

FOUNDED IN 1839, Boston University continues to have a global influence on science and medicine, journalism, literature, business, civil rights, government and politics, entertainment, broadcasting, popular culture, and sports. For a century, Boston University Summer Term has connected students from around the world to BU's award-winning professors, on a campus in the heart of Boston—one of the nation's most distinct and exciting cities.

THINK EXCELLENCE

Boston University is among the world's top academic institutions, placing 32nd in the *U.S. News & World Report* Best Global Universities rankings. At Summer Term, you'll find more than 700 courses offered by 13 of BU's 17 schools and colleges.

THINK FLEXIBILITY

Advance your studies and gain new knowledge in classes offered during the day, evenings, or online. Convenient six-week sessions mean you can satisfy program prerequisites, degree requirements, or your own curiosity—while making the most of your summer.

THINK BOSTON

There are many reasons that Boston is ranked the top U.S. city for students (QS Best Student Cities). Boston is a thriving hub of culture, innovation, diversity, and progressive thinking—it is New England's largest city, and it's still easy to navigate on foot, by bicycle, or via public transportation (the MBTA, known locally as the "T").

THINK OPPORTUNITY

Meet new people from around the world, develop new friendships and career networks, and engage with professors and peers in small, intensive classes.

Chemistry

Choosing the Right General Chemistry Course:

CAS CH 101 is the first semester of a two-semester sequence of introductory chemistry designed for science majors (biology, chemistry, biochemistry, premedical/dental) requiring two semesters.

CAS CH 131 is a one-semester course designed for engineering majors requiring only one semester.

CAS CH 171* is a one-semester course designed for some biological and health science majors requiring only one semester.

**Note that CAS CH 171 and CAS CH 172 are not two semesters of general chemistry.*

Choosing the Right Organic Chemistry Course:

CAS CH 172* is a one-semester survey course covering the fundamental aspects of organic chemistry and biochemistry, for students requiring only one semester who are interested in the biological and health sciences.

CAS CH 203/204 is a two-semester sequence that satisfies the requirements of most students interested in pre-medicine/dentistry, other medical/health sciences, or biological sciences.

CAS CH 203/214 is a two-semester sequence designed for students requiring a more intense laboratory experience than **CH 203/204**.

Choosing the Right Biochemistry Course:

CAS CH 273 is a one-semester course designed for some biological and health science majors requiring only one semester.

CAS CH 421 is the first semester of a two-semester sequence designed for chemistry and biochemistry majors requiring two semesters.

Internship placement is a key element of our program, and we work hard to find an internship experience that best matches your goals and abilities.
