# Chemistry

## Choosing the Right General Chemistry Course:

**CAS CH 101** is the first semester of a two-semester sequence of introductory chemistry designed for science majors (biology, chemistry, biochemistry, premedical/dental) requiring two semesters.

**CAS CH 131** is a one-semester course designed for engineering sciences majors requiring only one semester of chemistry.

**CAS CH 171\*** is a one-semester course designed for some biological and health science majors requiring only one semester of chemistry.

## Choosing the Right Biochemistry Course:

**CAS CH 373** is a one-semester course designed for some biological and health science majors requiring only one semester.

**CAS CH 421** is the first semester of a two-semester sequence designed for chemistry and biochemistry majors requiring two semesters.

## Choosing the Right Organic Chemistry Course:

**CAS CH 172\*** is a one-semester survey course covering the fundamental aspects of organic chemistry and biochemistry, for students requiring only one semester who are interested in the biological and health sciences.

**CAS CH 174** is a one-semester survey course covering the fundamental aspects of organic chemistry, for students who do not require a two-semester sequence in organic chemistry.

**CAS CH 203/204** is a two-semester sequence that satisfies the requirements of most students interested in pre-medicine/dentistry, other medical/health sciences, or biological sciences.

**CAS CH 203/214** is a two-semester sequence designed for students requiring a more intense laboratory experience than CH 203/204.

*\*Note that CAS CH 171 and CAS CH 172 are not two semesters of general chemistry.*

# SUMMER HIGHLIGHT

## Cross-College Challenge

This unique internship-like opportunity allows you to gain valuable, real-life experiences while developing the leadership, teamwork, and communication skills employers and graduate schools are looking for. You will work with a small team of students from different BU Schools and Colleges to tackle pressing contemporary problems and enduring human questions, while immersing yourself in campus life and the City of Boston. Students interact with both on- and off-campus partners, working to find new answers to the current challenges that affect both BU and the City of Boston.

Summer 2018 teams will develop projects in conjunction with campus agencies—including [Sustainability@BU](mailto:Sustainability@BU).

# Summer Study Internship Program (SSIP)

May 21–August 17, 2018

Exclusively for visiting undergraduate students, this unique 12-week program is an opportunity to earn 10 academic credits—and gain hands-on work experience toward your future career.

For the first six weeks, you'll take two Boston University summer courses in one of eight academic tracks. For the second six weeks, you'll work as a full-time intern in a Boston-area company or organization.

Internship placement is a key element of our program, and we work hard to find an internship experience that best matches your goals and abilities.

Throughout the program, you'll also participate in a 2-credit internship course. The Internship Course prepares you for your internship and helps combine the academic and experiential elements of the program.

## Academic Tracks

## Housing

On campus housing and dining are available for an additional fee.

## Admissions

The Summer Study Internship Program is open to visiting undergraduate students who are U.S. citizens or permanent residents, and who have completed at least one year of college by the start of the program.
