

# Icertis Newsletter

JANUARY 2021

The latest on products and features, and company and customer news.

## The Icertis Supplier Onboarding and Diversity Compliance Application

In 2021, companies want to make sure their supplier relationships to reflect their values of diversity and equality by working with Disadvantaged Business Enterprise vendors.

How can they get new suppliers onboarded quickly, and in compliance with new company initiatives and existing regulations?

- Self-service onboarding process and rule-based routing for easy clearance makes the entire process smooth and simple.
- Visibility into compliance status ensures a foolproof audit process through automated workflows for verification of diversity compliance (DBE compliance, e.g.), dashboards for status tracking and monitoring, and alerts for any violation.
- Easy integration and communication between admin and suppliers via the ICI Collaboration Portal reduces hassles and accelerates time-to-value.

## Accelerating procurement's time-to-value

Gateway Health went from discovery to go-live in 86 days.

"The Icertis Contract Intelligence platform will enable us to speed our contracting, improve visibility and increase efficiency across our legal and procurement teams."

Frances A. Woodward,  
Senior Vice President, Chief Legal Officer and Corporate Secretary,  
Gateway Health
