

#### OUR REACH

We serve clients across the world from more than 150 locations.

For our transportation clients, Actalent offers engineering services through 10 delivery centers across the United States, Canada, and India.

#### OUR SECRET

We know what motivates our talent to perform and be inspired to excel. We know what skills and services transportation companies need to achieve success. Most importantly, we know how to bring it all together to support getting your work done.

#### OUR EXPERIENCE

We partner with some of the most recognized and respected automotive companies in the world to solve some of the most complex challenges in the industry – including the top 10 largest in the US.

#### OUR PROMISE

Advancements in technology have opened new realms of possibility for the development, manufacturing, and use of automobiles. We will connect you to the brightest, pioneering minds in the transportation industry who will help bring your vision—and these possibilities—to life.

*Actalent connects passion with purpose. Our talent solutions and services capabilities drive results and provide the expertise to help our customers achieve more. Every day, our experts around the globe are making an impact. We're supporting critical initiatives in engineering and sciences that advance how companies serve the world. People to Possible.*

# Transportation >>>>> AUTOMOTIVE

Increasing demand for high-value and connected vehicle software, electrification, and sustainable practices and products, combined with rapid advancements in machinery automation have changed the way people use and manufacture cars.

Today's automotive makers need access to skilled, flexible talent who can both anticipate and respond rapidly to change, keep pace with technological advancements, and maintain compliance with existing and emerging regulations. Robotics, Artificial Intelligence, Smart Manufacturing—you name it, they've done it. Our professionals are prepared to tackle the challenges you know about, and the ones you don't.

## Partnering with Actalent

Actalent's flexible engineering services and talent solutions are designed to provide immediate access to those best equipped to get your most important work done. Whether you're looking for specific expertise, need a team to manage and organize a project, or just a few experts to execute it, Actalent will partner with you on the perfect solution for your unique needs and position you for an exciting future.

### WHO WE ARE: Our Expertise

Application Developer  
Automation Engineer  
Autonomous Vehicle Test Operator  
Battery/Battery Management Systems Engineer  
Battery Test Operator  
CAD Designer  
Chemical Engineer  
Controls Engineer  
Data Analyst  
Electrical Engineer  
Electronics Engineer  
Embedded Engineer  
Engineering Analyst  
Firmware Engineer and Developer  
Hardware Engineer and Developer  
Manufacturing Engineer  
Mechanical Drafter  
Mechanical Engineer  
Motor Design Engineer - Electric  
Product Designer  
Production Engineer  
Project Manager  
Quality Engineer  
R&D Technician  
Software Engineer and Developer  
Systems Engineer  
Test Engineer  
Test Technician

### WHAT WE CAN DO: Our Capabilities

Controls and Automation Engineering  
  
Electrical Systems Development  
  
Embedded Systems Development  
  
Full Stack Software Development  
  
Manufacturing and Industrial Engineering  
  
Mechanical Systems Development  
  
Plant Engineering  
  
Product Support  
  
Product Sustenance  
  
Product/System Validation  
  
Smart Manufacturing  
  
Systems Engineering  
  
Tool and Equipment Engineering  
  
Value Engineering and Regulatory Compliance  
  
Verification and Validation
