

Flagler Health+ is now offering walk-in care at select Publix Pharmacies.

BY JENNIFER JAMACK

Flagler Health+ Anywhere Kiosk at the Nocatee Town Center- Now Open! Virtual treatments include: Colds + Allergies + Sinus problems + Earaches + and more

LET'S MAKE LIFE EASY.

You can now speak with a doctor at select Publix pharmacies! Yep, life just got that much easier. Wondering how it works?

1. Find a location near you, and tell the pharmacy associate at that store that you'd like to use Walk-In Care. They'll get you set up and answer all your questions.
2. A series of on-screen prompts will connect you to the doctor, and you'll talk to them by video.
3. You'll see a variety of tools—thermometers, pulse and blood pressure monitors, etc.—connected to the monitor. You'll use those with the doctor's guidance, and the results go to the doctor in real-time.
4. You can pick up your prescription or over-the-counter medication (if needed) right at the pharmacy once you're done!

We're bringing more to the healthcare equation by offering walk-in care at select Publix locations. Now, you can access quality healthcare from Flagler Health+ without needing an appointment. Simply walk into a participating Publix and receive virtual care from a physician on call.

THE KIOSK CUSTOMER JOURNEY

Get virtual care by board-certified doctors for colds, allergies, sinus problems, earaches, and so much more. No appointment necessary, open seven days a week, and only fifty-nine dollars per visit. Visit publix.com/walkincare for more details. Walk-In Care is a Flagler Health plus telemedicine service provided by licensed physicians. Walk-In Care is for patients ages two and older. In case of a medical emergency, call 911.
