

ISBAR ACTIVITY	STUDENT WORKSHEET
<b>INTRODUCTION</b>	
Your name, position (RN), unit you are working on	Hi Dr.Taylor, its Nurse Amanda calling from the ER...
<b>SITUATION</b>	
Patient's name, age, specific reason for the visit	I am calling in regards to our patient Scott Doe, 52 year old male. He was having breakfast with his friend when he starting showing symptoms of a stroke approx. 30minutes ago.
<b>BACKGROUND</b>	
Patient's primary diagnosis, date of Admission	(patient is in ER)
<b>ASSESSMENT</b>	
Current pertinent assessment data using head to toe approach, pertinent diagnostics, vital signs	The patient is alert and oriented x3 but is presenting with slurred speech, hemiparesis to the Rt side. He does have a history of HTN.
<b>RECOMMENDATION</b>	
Any orders or recommendations you may have for this patient	Am I able to get an order for a head CT? How often do you want neuro vitals to be assessed?
