

Subject: Calling all Unicorns...

Header: We're expanding our team!

Pre-Header: Are you even a little curious?

Body:

If you've chosen medical ultrasound technology as a speciality, you're already a singular individual.

But if you have two years or more of experience, long for a chance to put your skills to work for a variety of clients, and love the idea of working for a company with a social conscience, then you're more than a simple sonographer...you're a magical creature.

And we'd like you to join our herd.

Over the past 15 years, BB Imaging has built partnerships throughout Texas, Oklahoma, Kansas, and beyond, including relationships with Indian Health Systems that provide sonograms to those without easy access to services. Our staff is the biggest reason we're able to continue serving the underserved, and as we expand, our team needs to grow as well.

If you would like to practice your profession in an atmosphere that promotes excellence and appreciates dedication, serving an underserved population...let's talk.

We're looking forward to getting to know you.

BB Imaging (Team Unicorn)
