

# ASCTE Foundation Impact Report 2023

## ABOUT US

The Alabama School of Cyber Technology and Engineering (ASCTE) is the nation's **only** high school focused on the integration of cyber technology and engineering into all academic disciplines. ASCTE is a **public**, residential magnet high school serving students throughout the state of Alabama. Tuition and housing are **free**.

## MISSION

To ensure all students achieve high levels of learning to be successful in implementing cyber protections into the engineering lifecycle.

The ASCTE Foundation supports the school in a myriad of ways from fundraising to partnership development. As a State school, ASCTE does **not** receive local tax dollars. ASCTE receives a line item in the state budget that allows for school operation. The Foundation bridges the gap in funding by recruiting industry partners that invest in both the construction of our permanent campus and internship opportunities for ASCTE students.

### 103

Boarding Students

### 254

Total Enrollment

### 151

Commuter Students

 **34%**  
Female Students represented in the Student Body

 **80%**  
Core Faculty hold advanced degrees

 **100%**  
Students participate in an industry internship before graduation

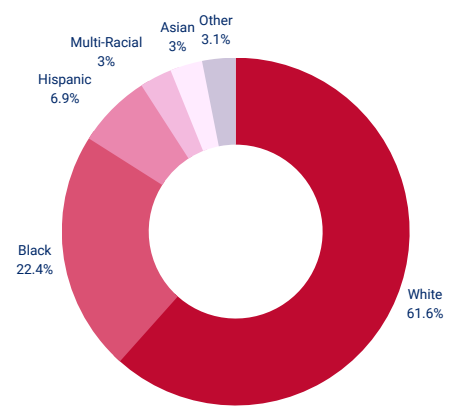

Admission to ASCTE is application based with a competitive acceptance process. Prospective students are reviewed holistically by an admissions committee. Rising 9th and 10th Graders across the State of Alabama are eligible to apply.

### Student Enrollment By Grade
