# Building Digital Rails for Urban India – Why We Invested in eGovernments Foundation

2nd February 2022

By Tariq Musthafa, Shilpa Kumar & Nandan Sharalaya

Omidyar Network India

Setup in 2003, [eGovernments Foundation](#) aims to catalyse urban transformation and enhance ease of living and ease of doing business at a national scale. To that end, it builds and deploys DIGIT, a National Open Digital Ecosystem (NODE) in cities across India. The platform helps digitize and automate back-end processes and enables citizens to access government services on their mobile phones.

## Digitizing Back-end Processes

## Accessing Government Services on Mobile Phones
