The Dixie Fire Long Term Recovery Group (known as the DFC -Dixie Fire Collaborative) is a collaboration of non-profit, faith based, local, state or national organizations that work together to share information and resources that can help address the needs of individuals and families affected by the Dixie Wildfire.

The stated mission of the DFC is working to fulfill the unmet needs of Dixie Fire survivors and helping to rebuild the communities of Greenville, Indian Falls, Canyon Dam and Warner Valley. All programs shall support this mission and purpose, and all who work for or on behalf of the DFC shall understand and adhere to that purpose.

PG&E Update

GREENVILLE, Calif. —Pacific Gas and Electric Company (PG&E) has completed an 8-mile main underground power line from a substation in Canyon Dam to Power Line Road along Highway 89. With the new main power line completed, PG&E will transfer power from substation generators to grid power on September 18 and 19.

More than 1,600 PG&E electric customers, mostly in Greenville and some in outer Crescent Mills, will no longer rely on utility scale generators at PG&E's Crescent Mills substation. The switch to grid power provides more consistent and reliable energy delivery and eliminates noise and emissions from substation generators.

To safely transfer the power source, the first planned power outage will be on Monday, Sept. 18, occurring between about 4 and 7 p.m. for 263 customers in Greenville.

The second planned power outage will be on Tuesday, Sept. 19 occurring between about 4 and 6 p.m. and affecting 1,628 customers in Greenville and outer Crescent Mills.

PG&E has notified impacted customers by phone calls.

In about mid-October, traffic controls will no longer be in place between Canyon Dam and Greenville as PG&E's contractor stops asphalt restoration. Asphalt restoration will resume in the spring after winter weather.

After underground power lines are energized and placed into service, PG&E will later remove overhead power lines that previously provided power.

PG&E is working closely with the County of Plumas and other agencies to ensure our work is well coordinated with the other projects such as road work.
