

# One platform. Unlimited learning.

World-class online education that empowers teachers and students.

Automated analytics to determine personalised learning pathways

Whole curriculum solution for Year 5-12 students

Round the clock personalised support

Loved by over 50,000 teachers in 3,000 schools

# Welcome

Education Perfect is a complete online teaching and learning solution with customisable content, adaptive learning programmes, data analytics, and comprehensive insights on student learning, progress, and achievement.

Our content is targeted at students from ages nine to 18 and is fully aligned with the Australian Curriculum – ensuring that learning is relevant, engaging, and empowering. At EP we understand the financial demands that resources can place on a school’s budget and that’s why we offer a streamlined, multi-faceted, and dynamic solution that allows costs to be consolidated.

In addition to subject content, the EP platform collects, analyses and clearly presents student engagement data and learning trends at an individual, group, and cohort level. This allows teachers to differentiate effectively and offer personalised and evidence-based solutions.

Each classroom is different, and so we developed our proprietary content editor, EP Studio, an intuitive solution that provides teachers with the ability to fully customise lessons and share them with colleagues. Our secure database is only accessible by school teachers and students, providing peace of mind for data security and privacy.

EP now works with over 3,000 schools across Australia and New Zealand, providing learning opportunities for over 1.2 million students. As we grow, we are conscious that our technology is most powerful when it is paired with authentic human connections. We believe in openness, collaboration, and equitable access to education. That’s why we will always provide personalised customer support, and offer subsidies for schools with lower socio-educational value.

We’d love to talk with you and discuss how we can create a tailored solution for your school that will leverage the power of our world-class educational technology to empower your students and staff. See our website or get in touch to book a personal call.

Wishing you all the best.

*Ian Pedder*

# Why choose Education Perfect?

## Real learning, real results.

Our world-class technology helps inspire your students to be inquisitive and successful learners.

- Automatic next steps**  
 Targeted learning suggestions are generated based on formative and summative assessment tasks.
- Powerful assessment tools**  
 Secure and automated EP assessments reduce teacher marking and facilitate individualised revision.
- Insightful data and reporting**  
 All achievement data is tracked and automatically collated into intuitive reports.

## Know your impact.

We know that you need good data to plan effectively. So our programmes provide functional data on student learning, progress, and achievement across a range of measures. Spend your time on students, not spreadsheets.

### Our data helps with:

- Whole school and cohort level oversight
- Board of Trustees reporting on goals and targets
- Report writing
- Differentiation
- Individual Education Plans
- Whole school engagement insights

## Learn any time, any place.

We believe in the power of the individual to know how they learn best. We're flexible, just like the real world. That's why our resources support both independent and collaborative learning and are always available to students. There are no limits to learning.

# Curriculum-aligned content

**We're from the classroom, we know the pressures and challenges.** That's why all of our content is fully aligned with local curricula and reviewed by experienced teachers. That means that your students are learning what they need to know, and you can customise the content further to your precise needs, knowing that the learning outcomes will meet national standards.

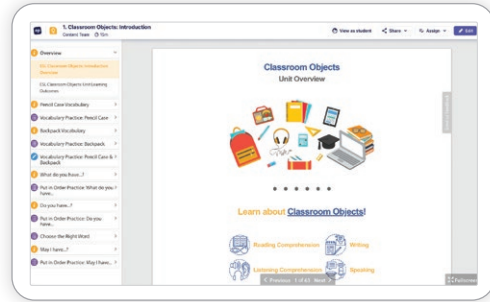

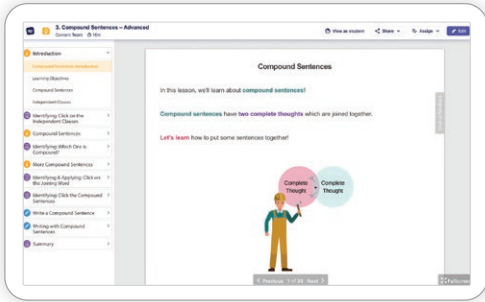

## Maths

- **Interactive lessons allow students to enter line-by-line working for mathematical calculations, and answer detailed questions on the platform in both numerical and written form.**
- **Comprehensive curriculum coverage from Year 5 to 12, complete with visual aids for statistics, geometry, number, and algebra.**

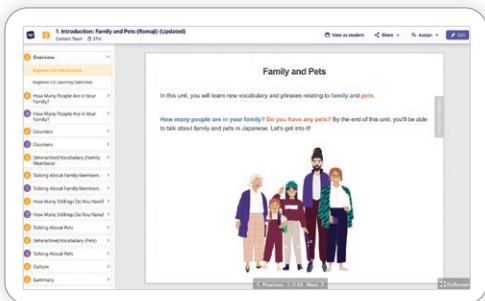

## Science

- **Multi-media supported contextual lessons that provide interactive simulations, visual aids, video support, and a range of question types to improve scientific understanding.**
- **Comprehensive coverage of the Year 5–10 science syllabus as well as Year 11–12 biology, chemistry, physics and psychology courses, allowing students to advance and specialise in areas of strength, and progress at their ability level.**

## English

- Skills-based lessons focussing on literacy development, spelling lists, figurative language, and poetic devices.
- Thematic lessons with localised content by award-winning authors that delves into plot, theme, setting, characterisation, and engages students.
- Customise our lesson plans to align with your novel or film study.

## Languages

- Vocabulary lists and an interactive multi-modal revision package to allow repetition, practice, and gamified learning.
- Aural content with native speaker recordings allows students to hear the correct pronunciation and improve their own.
- Thematic content makes learning relevant, engaging, and effective.

## EAL

- Comprehensive use of multimedia tools to facilitate pronunciation practice including voice recording, video clips, and a variety of audio tasks.
- Individualised assessment for differentiated learning pathways with immediate feedback and automated reporting.
- Self-paced learning through scaffolded lessons, levelled vocabulary, and language lists.

Additional content covers the following:

Health

Humanities

Ditech

# What sets Education Perfect apart from other platforms?

## Make our resources, your resources.

We know that you know your students best. That's why all of our content is fully customisable. With over 35,000 adaptable lessons, we help you to create a truly local curriculum.

## Work smarter, not harder.

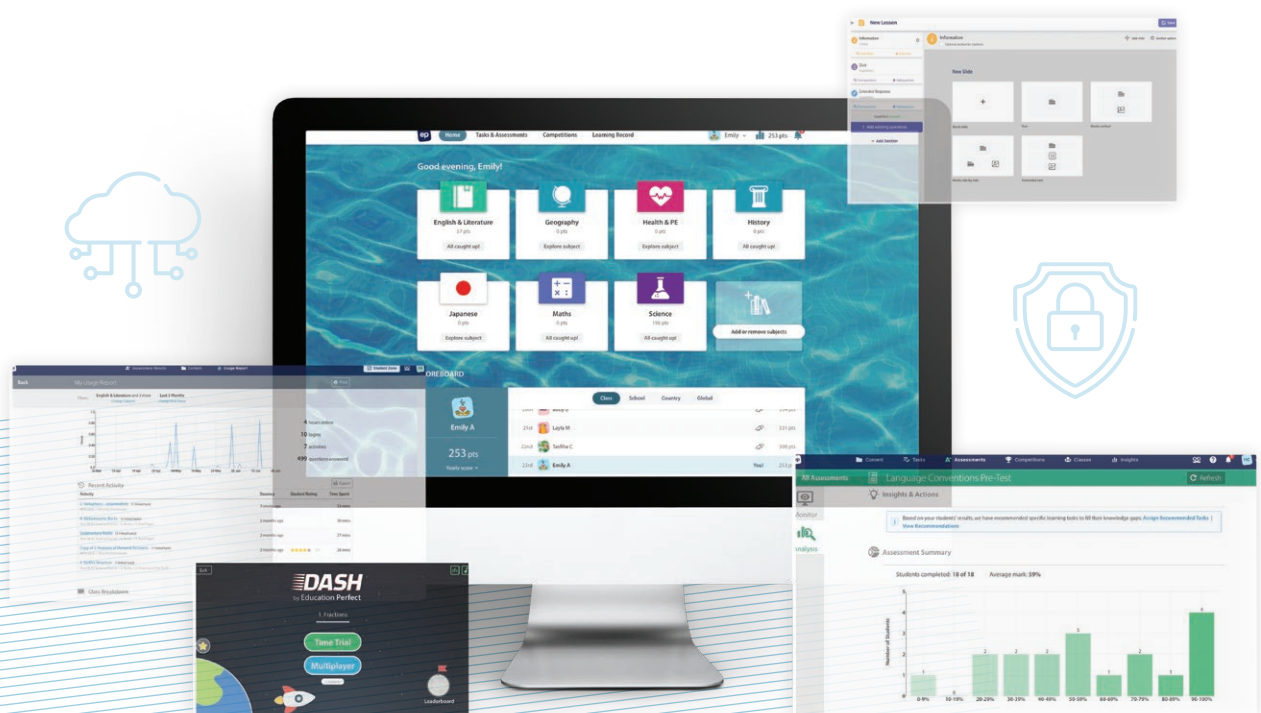

We love technology that works intelligently. That's why we made seamless integration with other key education tools a primary focus. Our job is to make learning easier, and that means no barriers.

## Learning is personalised and responsive.

We understand that your students learn in different ways, and at different rates of progress. We help find the best individual pathway for each student, and make sure it's responsive to their changing needs.

### We provide:

- Differentiated individual learning plans based on students' areas of strength and weakness.
- Live tracking of students' engagement, learning, progress, and achievement.

## World-class technology.

We're constantly reflecting, innovating, and collaborating to make sure our resources are accessible for all learners.

### We offer:

- Personalised implementation support.
- Bespoke professional development courses and events.
- Individualised teacher consultant for each school to plan your pedagogical approach to online learning.
- In-platform messaging for feedback and support.
- Cloud-based platform that is accessible from any device.
- A reliable platform built on AWS infrastructure.
- Secure data storage.

## Testimonials

EP is a remarkable tool with a plethora of options like scratchpad and multiple-choice questions. The diverse ways of assessment helps me to customize my teaching as per the individual learners need. [It allows me to] obtain very systematic data to tap on the topics that my students struggle to understand, and further on helps me to create remedial tasks to revise the weak areas. Very well designed and implemented program.

### Priya Bindal

*Launceston College, Tasmania*

Education Perfect was added to our suite of online learning tools to provide teachers and students with additional learning content closely aligned to syllabus outcomes. Teachers have the option to integrate EP lessons into regular classes in order to obtain live feedback; set tasks for homework or provide individual remediation for specific students depending on their specific needs. With teachers having access to supplementary resources, they continue to focus on adding value to the learning process through their facilitation in the classroom and feedback to students.

The analytics derived from EP can also be useful in teachers tracking student progress and engaging with timely learning interventions with individual students. This is another tool that our teachers use to ensure that all students can experience learning growth.

### Grant Murphy

*Dean of Learning  
Rosebank College, Sydney*

# Real learning. Real results.

We believe in humanising world-class technology to inspire inquisitive minds and create lifelong learners.

## World-class partners.

We invest in strategic partnerships, and never stop striving to be the best.
