

About

H1: Professional Surveillance System Installation Company Serving Rochester, MI

H2: Over 15 years of providing technical solutions and support for businesses

At Building Security & Automation, we pride ourselves on being able to understand your business, your current security challenges, and offer the best solutions that fit your needs and budget. For over 15 years, we have been providing expert technical solutions and support for all our commercial clients. Our staff has years of experience, expertise, and knowledge working in the security industry. They have designed and installed systems of all sizes, for several industries, including financial institutions, schools, college campuses, healthcare centers and a variety of commercial buildings.

Our Services

The scope of services provided include a wide arrange of technological services with specialization in access control, video surveillance, alarm, and Intercom systems as well as wireless and LAN networks and cable management. Additionally, Building Security & Automation is unique in that we will work with existing systems and provide integrated solutions to meet customer needs while minimizing costs.

What Sets Us Apart

At Building Security & Automation, we aim to be your one-stop shop with services extending far beyond security and automation. From network installation and maintenance to electrical services- we are an all in one security solutions provider. Our team works on, maintains, repairs, and even expands all makes and models of security equipment because we believe everyone deserves a secured space. We aren't your typical security provider that provides cookie-cutter solutions for its clients. Our company understands that no two businesses are alike, and for that, we approach every project uniquely and ensure it's tailored to our customer's needs. Lastly, we work on your schedule- not ours. When you choose Building Security & Automation, you are given our teams direct contact info, meaning we are always reachable whenever you need it. We also offer remote support which can help solve any issues you're experiencing immediately rather than waiting for an in-person service visit.

When it comes to security systems, we know what's best. Our industry professionals will be able to provide customized security solutions for your business. Contact us today at (248) 759-8469 for a free security evaluation!

Building Access Control Systems

Let the right people in- while keeping the wrongs one out. Our access control systems give you maximum building protection to prevent any unwanted person entering the premises.

Security Cameras & Remote Monitoring

Keep an eye on your business with video surveillance. Protect your company, its employees, and your assets with expert monitoring solutions.

Fire & Burglar Alarm Systems

From potential fires to burglaries- we have an alarm system for you. No matter the size of your building, we can customize an alarm system that fits your building's specific needs.

Access Controls

[H1: Access Control System Installations in Rochester, MI That Fit Your Business' Needs](#)

[H2: Simplify Your Security Challenges with a Custom Designed Access Control System](#)

Investing in the right technology to protect your building, employees, and site visitors is essential for the success of your company. Building Security & Automation makes it simple to let the right people into your building while keeping the wrong ones out. With our door access control systems, we design them specifically for your business' needs such as performance, flexibility, and budget.

Our company understands that you want your business premises to be as welcoming as possible and make it easy for employees and staff to visit. However, at the same time, you need to ensure the maximum protection against any unwanted intruders on your premise. At Building Security & Automation, we create reliable, customized access control systems that utilize cutting edge technology to keep your building and its tenants secured.

Beyond Simple Building Access

Our access control systems do more than just open doors; they also track employee, visitor and any equipment movements in and out of your premises as well as restricted areas within your

facility. The access control systems we design can also automate employee time and attendance reporting. We offer a variety of security badge options which can be used with our biometric systems for dual verification purposes.

Web-Based Access Control

Our web-based access control systems require no PC or hard drive which means they are flexible and can grow with your company. The security administrators of your building can efficiently manage the access control system from anywhere that has internet access.

High-Tech Solutions

Our company offers a variety of access control systems that can meet any requirements you may have. Whether you'd like a modest system that uses proximity cards or a high-tech biometric system that uses fingerprints and facial recognition-- we can handle it all.

Administrative Assistance

We understand that running a business is not easy. Our team can take some of the stress off of you by taking over the administrative work of any access system you have installed. From changing user permissions to adding new users, our team will be happy to help.

Open/Close Reports

Our crew can run special reports that will inform you of the times your employees entered and exited the building as well as who is accessing specific areas at specific times.

Our Access Control Installation Services Include

At Building Security & Automation, we have expert access control installers that will oversee the entire installation process from start-to-finish. From site assessments to configuration and documentation of your customized system settings- our team will be there every step of the way and can answer any questions you may have.

- **Site Assessment** – Our team will conduct a thorough site survey and design. Once we assess the basic schematic of your floor plan, we then address your security needs and questions.
- **Access Control System Installation** – Our expert access control installers will install and optimize your access control system.
- **Cabling** – The access control installers will then install and run the required Ethernet, video and/or power cabling needed for the building.
- **The Configuration of Remote Workstations** – Then we will engage the user-friendly access control software and interface to connect, configure, and optimize any remote workstations for your specific system.
- **Documentation** –Lastly, we will provide easy-to-use documentation as well as the archiving of system settings for your specific unit.

At Building Security & Automation, we are a reliable and reputable security services provider that customizes and installs access control systems in buildings. For more information, give us a call today at (248) 759-8469 for a free security evaluation.

Video Surveillance

H1: Keep an Eye on Your Company With Business Security Camera Systems in Rochester

H2: We Offer Advanced Surveillance Technology for Easy Monitoring

Businesses today have more complex security needs than ever before. Security issues such as employee theft, property damages, fraud, inventory shortages, shoplifting, and more can take a toll on business. Fortunately, Building Security & Automation installs commercial security camera systems for a variety of businesses so you can see what's happening with your company at all times. We tackle security challenges head-on with advanced security systems that can protect your business in the event of a problem.

Video Surveillance Solutions for Your Business

For most businesses, video surveillance has become an essential security feature. At Building Security & Automation, our team can install a video surveillance system that can meet your company's requirements so you can see what's happening in real time.

24/7 Monitoring

For many businesses, 24/7 protection is essential as you can maintain a close eye on it after businesses hours. We can set up a system that will enable you to monitor your property 24/7 through a digital video recording.

Integrated Video Surveillance

When systems work together, they're at their most powerful state. Our integrated video monitoring will be able to trigger your cameras to record any motions they may detect.

Remote Monitoring

Watch your company in real time no matter where you're located. Our services enable you to watch a live video feed from your phone or computer- all you need is internet access.

HD Cameras

Never worry about grainy videos or distorted images, we use only the best HD cameras that provide a sharp, clear picture.

Advantages of Video Surveillance Systems

Using video surveillance in or around your workplace can help protect you and your employees if a problematic situation occurs. With irrefutable video evidence, our surveillance systems can do more than just protect company assets.

Reduce Risk of Internal Theft and Fraud

Fraud and theft by employees still remains a significant issue in businesses, especially in the financial and retail industry. Having a video surveillance system in place can go a long way in catching and preventing any illegal activities that could potentially hurt your company.

Increased Productivity

There have been studies that show when a video surveillance system is implemented, employees are more productive with their day to day tasks. Business owners and managers can spend more time focusing on more productive tasks rather than making sure their employees are doing their respective jobs.

Enhance Safety

A concern for many business owners is trespassers on their premises. Business owners, managers, and employees will benefit from video surveillance as they can keep an eye on any unwanted visitors approaching. Our camera systems can also significantly increase safety in the event of any accidents. If there was an accident, there's recorded evidence that can show who was at fault and prevent any wrong calls.

With our interactive video security cameras, we can help you prevent burglary, potential employee theft, vandalism, and more. For a free security evaluation, call us today at (248) 759-8469

Alarm Systems

[H1: We Provide Reliable Commercial Alarms System Installations to Rochester, MI Businesses](#)

[H2: Let Us Help You Protect What You Value the Most](#)

No matter the type of business you run, having an alarm system implemented is essential for the safety of you, your employees, and any visitors your company may have. At Building Security & Automation, we are the leading business alarm company in Rochester, MI. We provide expertly designed fire and burglar systems that will keep your building safe in the event of an emergency. We understand that it's hard work building a business, which is why it's important to choose the right security feature that can protect your assets as well as those who are employed there.

Fire Alarm Systems Designed With Your Business in Mind

One of the most catastrophic events that can happen to your building is a fire. Not only is it a threat to the structure of your building, but those who are in it as well- such as employees and customers. Fires can be a substantial financial burden, and can even make some companies close their doors for good. We can help you reduce the risk of any fire-related losses with our fire alarm systems.

Whether you have a small company with five employees or a large company with 500 employees, we have the fire alarm system for you. We can install multiple fire alarms throughout a larger building to ensure all your employees get out safely. You can count on Building Security & Automation to detect, locate, and contact the nearest fire department for a fast response and safe evacuations.

At Building Security & Automation, our services don't just stop at installations! We will offer continued service, maintenance, and testing to ensure your fire alarm systems is up to code and working correctly.

The Burglary and Intrusion Features of Our Systems

We know your business is unique, just like your security concerns. We can come up and develop a security solution plan that is right for you. Our burglar alarms systems come with a wide range of features that'll keep you on top things in the event of a crisis.

Keypads- Our systems are controlled by using alphanumeric keypads that are either standard, integrated with your fire system, or wireless. With our keypads, we have internal sirens, and we can program them with quick keys for emergencies.

Panic Buttons- Depending on the layout of your building, we can equip it with panic buttons that are either "on person" or "under the table."

Motion Detectors- Our motion detectors come with ranges of up to 250 feet and can sense both motion and heat.

Cellular Communication- Our company uses the 4G cellular network for alarm notifications. We can also install landlines for alarm notifications if necessary.

Glassbreak Sensors- if your building has a lot of windows, investing in glassbreak sensors may be a good option for you. Our sensors can pick up the frequency of shattering glass that provides more security to your building.

Protect your business with an alarm system you can count on. Give us a call today at (248) 759-8469 for a free security evaluation for your burglar or fire alarm system.

Building Automation

H1: Save on Utilities With Office Property Automation Systems in Rochester, MI

H2: Simplify Your Building With A System That Controls Your HVAC and Lights

When you own a business, it's tough to keep track of the little things, such as HVAC and the lights. Luckily, at Building Security & Automation, we specialize in designing and installing custom building automation systems for your business. We have the expertise of the most advanced systems with a deep understanding of today's facilities' requirements. Our company can provide your business with an integrated and centralized automation system that can turn your ordinary office into a smart office.

Why Choose Us

We understand that no two buildings are alike; for this reason, our experts will customize a design and install an automation system that's tailored to your needs. From design to installation- our team does it all. We use complete design documents such as flow diagrams, panel layouts, point to point wiring, and more to ensure your custom automation system will work in your building.

Our services don't stop at the installation; we will continually work with you and offer any support you may need. We will happily address any concerns, maintenance issues, or problems that may prevent your automation system from functioning correctly.

Automate Your Property for the Comfort, Convenience, and Efficiency

Whether your building has systems for air conditioning, heating, lighting, or power generation, the more integrated these systems are, the better. Integrating these systems have numerous benefits, such as an increase in the value of your building and a decrease in your utility bills.

Reduced Maintenance Costs

Our automation systems have building controls that are designed to make your equipment run less and operate more efficiently when it does run. The result of this is your system's lifespan is prolonged and requires less maintenance and repairs.

Maintains Comfort Levels

Keep your employees and customers happy with even temperatures throughout your building. The automated controls keep the building's temperature regulated while reducing energy costs.

Significant Energy Savings

The lighting in a building consumes a large amount of energy and is wasted on areas that aren't occupied. Save up to 30 percent on annual lighting costs by simply installing an automation system in your building. Our systems can schedule when the lights turn on, turn off, and have sensors that can shut lights off in areas where it's unoccupied.

No matter the size of your building, we can design and install an automation system that works for you. Let our team help you decide which type of system can benefit your building the most, call us at (248) 759-8469 for a free evaluation.

Testimonials

H1: Our Reputation Speaks for Itself, Check out What Some of Our Customers Have to Say!

H2: We offer more security protection and control than any of our other competitors

"Building Security & Automation is our go-to for many tech solutions; including security systems, network engineering and wireless infrastructure. They are knowledgeable and honest; I'm confident that we've been sold what our organization needs and that it's been installed professionally. When we need help, we are treated with respect in a timely manner. I can always trust Building Security & Automation! " -Carolyn Westmoreland, Technology Director, St. Joseph Catholic Church & School

"Building Security & Automation has been a valued partner to our business for nearly two years. The expertise of the staff in solving complex network issues has helped us grow our company and keep our customers happy with the performance and reliability of our network."- Bobby Burton, Chief Operating Officer, SpaceLabs Detroit

"Building Security & Automation is my go to company for all my building camera and door access needs. They have great solutions for schools that are working with tight budgets and need to find unique ways to optimize new and existing equipment. If you just want someone to help you and not a sales suit than Building Security & Automation needs to be in your Phone"- Mark, Maintenance Supervisor, Goodrich Area Schools

"I wish to take this opportunity to express my sincere gratitude for the work you have undertaken on Basco Detroit's behalf on the IT Services and Camera System projects for Basco as well as our tenants. Our tenants expected the service you and your team have given us as well as our tenants. Under promised and over delivered every time. I am especially grateful to you for the way we are coordinating your work with the other trades which was highly beneficial to the continued success till conclusion of these projects. I will have no hesitation in

employing Building Security and Automation now or on future projects and therefore, look forward to continuing working with you and your team; demonstrating a positive 'can and will do approach' throughout. (whatever it takes attitude) In conclusion, I want to thank you and please forward my thanks to your team for their contribution to making our projects the success that they are. "-Michael Al, Director of Operations and Construction, Basco Detroit

"I have used Evan for roughly 3 years. Evan, has really made my experiences great! Anytime I have an issue he always is readily and available! He often is driving and pulls over to put my requests in or goes behind the scenes after hours and takes care of my issues. Evan truly makes my day greater not having to worry about my IT issues. Follow up won't be a concern, he always has me recheck systems to make sure he completed the task properly! I would definitely recommend him to anyone!" -Maili Lamb Residential Manager-Ressco

"I have worked with Evan many years. He has helped me with many properties needing IT services! Evan has always given me quotes and services immediately and without hesitation! With my busy schedule Evan helps me with my IT and Security services without hassle many years! I would recommend him to anyone I knew!"- Dave Durfield-Ressco
