

## Who We Are

The KY AIDS Education and Training Center (KY AETC) has been a cornerstone of the Health Resources and Services Administration's (HRSA's) HIV/AIDS program for over two decades. The mission of KY AETC is to increase the number of health care providers who are effectively educated and motivated to counsel, diagnose, treat and medically manage people with HIV, and to help prevent high-risk behaviors that lead to HIV transmission. KY AETC works toward this mission by implementing multidisciplinary education and training programs for health care providers in the prevention and treatment of HIV/AIDS. Overall, KY AETC is charged with increasing the capacity of providers and organizations to implement quality care and increase access to care. KY AETC aligns with the goals of the National HIV/AIDS Strategy (NHAS) to:

- Reduce new HIV infections
- Increase access to care and improve health outcomes for people with HIV
- Reduce HIV-related health disparities
