WHY CARDINAL IT CONSULTANTS?

If you are considering outsourcing your company's IT support, consider the benefits of having us provide you with the full gamut of technical services. By ensuring IT optimization, *you* can focus your *business*. You will rest easier knowing your every technical need is handled completely and competently. We aim to exceed your expectations, knowing that what you *don't* have to worry about is pivotal to business continuity.

When we partner with you as your managing IT service provider, your company's technical efficiency is improved, all while lowering costs and freeing up your IT staff to work on more strategic projects.

The last thing you need is an interruption in service to your clients. That's why Cardinal IT Consultants are here, to ensure your company's stability and growth.

“Over 95% of companies experiencing a server disaster without a recovery plan in place go out of business within 18 months.” —PricewaterhouseCoopers

Our consultants are experts in performing comprehensive audits of IT systems, no matter how large or small. They create backup and disaster recovery plans that work with your business' technical needs, including clustering, replication, and cloud technologies. We are committed to working within your budget to ensure your business interests are secure.

PARTNER

We know that your IT needs shouldn't get in the way of your customer relationships. That's why *our* relationship with *you* matters. Because of our customized IT support, you are able to provide your customers with a sublime experience to keep them delighted—and returning for more.

“We create a singular customer experience for each of our partners.” —Tyler Cardinal, COO

Our Five Star Tenants

As your IT Partner, we incorporate our Five Star Tenants of service to make your experience with us literally—*stellar*.

- 1.) GROWTH — We are a company that grows with our clients. Because we continually strive toward professional and relational growth, the possibilities for our partners are limitless.
- 2.) PERFORMANCE — We perform to the highest standards of the industry. We consistently demonstrate our competency in all crucial areas, including Business Continuity Plan Management and Cloud Computing, and we're continually updating our knowledge base to remain in step with industry standards.
- 3.) RELATIONSHIP — We prioritize our partner relationships. You can be assured that our people specialize in the area of account management, *not* sales; you will only be sold the services that match your company's needs.
- 4.) EXPERIENCE — We make it a priority to remain up to the minute on accreditations and certifications. We also maintain strong partnerships with essential technology suppliers to provide the latest solutions that equip us with the resources to meet your needs.

5.) TRANSPARENCY — Our service level agreements clearly indicate all commitments, including guaranteed resolution targets and response times. Contracts are 100% transparent; our partners always know *exactly* what to expect in the bill.

IT SERVICES

Cardinal IT Consultants provide managed IT support on all levels—Full, Partial, and Ad Hoc, so your company can select precisely the services it needs.

Full Support provides your organization with a complete IT department. All your technical concerns are taken care of: account management, engineering, onsite support, managed monitoring, ticket Management, setup, IT roadmap, and project services.

Partial Support allows you to supplement your in house IT services. By collaborating with us, you'll enjoy the peace of mind of having managed IT services, including consultancy, project services, set up, ticket management, managed monitoring, and support teams.

Ad Hoc Support enables your business to pay along the way, selecting only the services you really need. We collaborate with your organization to create the ideal plan of service for your IT support needs.

Cardinal IT Consultants provides your business with the core essentials: IT optimization, business continuity, cloud computing, and vendor management.

IT Optimization — Seamless IT operation is what IT optimization is all about. Our team continually strives to maintain interruption free IT operations for your organization, which is exactly what you should expect from your managed IT service provider.

Business Continuity — We are committed to helping your organization maintain its capabilities and uninterrupted delivery of goods and services. Cardinal IT Consultants uses Business Continuity Management Planning (BCMP) to create guidelines and procedures, in addition to software tools, to ensure that any disruptive IT incident goes unnoticed.

Cloud Computing — Finding the right cloud service provider (CSP) is essential to any successful business today. We will help you determine which cloud based services you need, assist in the migration process, and help your company get up to speed in all areas of cloud computing, including disaster recovery.

Vendor Management — Cardinal IT Consultants continually evaluates vendor performance beyond the contractual metrics. We holistically screen the relationship and delivery of service, allowing your organization to avoid undue risk, manage its costs, and promote excellence in service.
