

Comparison of MP3 Players with Bluetooth 5.0

The purpose of this comparison is to help purchasers determine which MP3 player with Bluetooth 5.0 capabilities meets their needs. Of the many brands of MP3 players, only two have been selected for this comparison. As technology advances, having the latest ones is becoming necessary as many older devices are no longer compatible with the technology we have today. Devices such as MP3 players have changed the way music and videos are listened to and viewed. The purchase of an MP3 player with Bluetooth 5.0 would need to take into consideration the following criteria:

- Memory storage
- Battery life
- Size
- Screen size
- Weight
- Price

Comparisons

There are many types of MP3 players on the market today. Since the birth of Apple's MP3 player called iPod shuffle, MP3's have evolved. No longer are they used for listening to music, but for other things like surfing the web, uploading photos, and so much more. The two MP3 players that will be reviewed are the AGPTEK 32GB MP3 Player and JOLIKE 32GB MP3 Player.

AGPTEK 32GB MP3 Player Bluetooth 5.0 [1]

JOLIKE 32GB MP3 Player Bluetooth 5.0 [4]

Memory Storage

AGPTEK MP3 player has an internal memory storage capacity of 32GB and supports up to 128GB with a TF card. A TF card or TransFlash card is an external memory card, when inserted into a device it can store more data. JOLIKE's also has the same internal memory storage capacity and supports 128GB as AGPTEK. The difference between the two is that AGPTEK mentions that with their own TF card it works better. JOLIKE does not mention a specific type. Overall, when it comes to memory storage, JOLIKE is a better choice due to not needing a specific TF card.

Battery Life

For battery life AGPTEK's MP3 player has a battery life of 48 hours of audio playback with headphones at a medium volume and 6.5 hours of Bluetooth playback. Also, the MP3 is fully charged in 2.5 hours. JOLIKE mentions having a battery life of 50 hours of audio playback at a medium volume and takes 1 to 2 hours to be fully charged. JOLIKE states that its battery lasts for 3 years. JOLIKE's model is a better choice when it comes to both battery life and charging time.

Size

AGPTEK's MP3 has a length of 4.17 inches, a width of 1.89 inches, and a height of 0.35 inches. JOLIKE's has a length of 2.7 inches, a width of 2 inches, and a height of 0.35 inches. When it comes to the size of both devices, it depends on the buyer's preference. Both are small enough to fit in pockets and are easy to transport.

Screen Size

AGPTEK's model has a 2.4-inch 3D curved screen surface. JOLIKE's model screen size is also 2.4 inches.

Weight

The weight for AGPTEK's version is 3.42 ounces or .21 pounds. JOLIKE's is 2.82 ounces or 0.18 pounds. Despite the small difference in weight, JOLIKE's model wins out over AGPTEK's when it comes to a lighter device.

Price

The price point for AGPTEK's MP3 according to Amazon.com is \$43.99 plus tax and JOLIKE's is \$42.99 plus tax. JOLIKE's price point from AGPTEK's may only be a difference of a dollar, its price point is lower and reasonable.

Conclusion

1. Both MP3 players contain the same memory storage capacity. However, JOLIKE's version offers more because it does not require its own TF card to provide a better performance.
2. JOLIKE's brand offers two additional hours of battery life, and its charging time is one hour faster than AGPTEK's.
3. When it comes to size, JOLIKE's MP3 player is smaller. However, both are small enough to fit in pockets and are easily transportable. As such, the buyer's preference will decide which one meets their need.
4. Both brands have the same screen size. AGPTEK's offers a nice design appeal with its 3D screen curved surface.
5. The weight of JOLIKE's brand is lesser in weight than AGPTEK's.
6. For the best deal in terms of pricing, JOLIKE offers their MP3 player a dollar less than AGPTEK's.

Recommendation

After reviewing the comparisons, I find JOLIKE's 32GB MP3 player a better option than AGPTEK's. When it comes to memory storage, battery life, weight, and pricing; JOLIKE's barely edges out AGPTEK's version. If a buyer is looking for a small, 32GB MP3 player with a long battery life, JOLIKE's MP3 player meets those needs better than AGPTEK's. With its reasonable price point, it makes a great low budget device.
