◀ EYE-CATCHING CROP

Liven up lackluster locks with a chic and *shiny* new bob. Chin-length, coffee-colored strands shimmer as fierce, full fringe falls below the eyebrows and feathers into the mane. Adding to the allure is the dark brown hue that dazzles as tresses catch the light *and* your eye.

DAZZLING DUO ▶

It takes two to tango, and a fashionable snip and gorgeous hue make the perfect pair. Taking the lead is a stunning silhouette with an asymmetrical cut and beautiful blunt bangs. Not to be outdone, a vibrant tangerine shade flawlessly falls into step to complete the breathtaking look.

Fringe Fundamentals

Want a great bang look? Here are some must-do tips to get that full, textured vibe...

- **Trim Notes** Always trim bangs when hair is dry and hold shears at a 45-degree angle to get the most natural, stylish cut. (For those less adventurous...most stylists offer free bang trims!)
- **Style Tips** A blow-dryer is key for nailing fab fringe. Also noteworthy: wet bangs are easier to style than damp bangs, so begin styling ASAP.
- **Product Musts** Remember, less is more...
 - For Smooth try a styling crème or serum to keep strands straight and sleek.
 - For Texture try a pomade or wax to help roughen up and define locks.
- **Right Length** Finding the right bang length is as easy as identifying your face shape. Oval, round, square or heart-shaped, there's a perfect length for you!

◀ STRIKING SILHOUETTE

This look is a knockout! Face-framing fringe packs a pretty *punch*, while textured ends help to break up the blunt bob's structure and bring a bit of sass to the silhouette. For the *kicker*—chestnut tresses are given an amber glow with understated, but exquisite highlights.
