

# Make Critical Decisions with Active Imaging

With our real-time visualization and guidance platform, we empower surgeons when it matters most: during the procedure.

LEARN MORE

## Visual guidance to improve outcomes

### UROLOGY

Paving a new path forward with innovations in urology imaging to help provide real-time guidance in the clinic or the OR.

LEARN MORE →

### HPB SURGERY

Open and minimally invasive visualization and guidance tools to solve unmet needs in general surgery and HPB procedures.

LEARN MORE →

### NEUROSURGERY & SPINE

Complete neurosurgery portfolio to give surgeons the power to make informed, data-driven surgical decisions and guide procedures.

LEARN MORE →

Our solutions assist in a wide range of applications:

ROBOTIC-ASSISTED SURGERY

COLORECTAL SURGERY

PELVIC FLOOR

MRI-ULTRASOUND FUSION

VISUALIZE, NAVIGATE, ASSESS

# Impact surgical outcomes with real-time intraoperative ultrasound.

At BK Medical, we are committed to changing the standard of care in surgical interventions with real-time active imaging. We are a team of innovators, educators, and medical experts working alongside physicians and their teams around the world to empower smarter surgery.

### BK Medical®

BK Medical is committed to designing active imaging systems that help surgeons visualize anatomy and lesions, guide interventions, and navigate inside the human body. Our mission at BK is to change the standard of care in surgical interventions with real-time visual guidance, giving surgeons the information needed to immediately make critical decisions.

Now, BK Medical is advancing its mission with **GE Healthcare**. Together, we will reach more customers and continue to empower surgeons to make critical decisions that allow for better care, faster procedures, and reduced complications.
