See more. Do more. The Galaxy Note8's Infinity Display provides you with a larger landscape to enjoy content, communicate with colleagues and create your own standout work. The S Pen puts the power to create in your hand, helping you breeze through work in and out of the office. And it's all protected and secured by the strongest mobile security in the business - Samsung Knox.

Design

Infinity Display

Multi Window

Infinity Display

Do more on a big screen

The Galaxy Note8 is beautiful. Its slim, sleek body is covered by an elegantly curved 6.3" Infinity Display that showcases content in all its glory – from vivid videos to crystal-clear documents. But the Galaxy Note8 offers much more than sublime style. It's the ultimate 'doing' device, with a larger workspace to create on using the powerful S Pen. From working with spreadsheets to creating technical drawings, the Galaxy Note8 is ready.

*Infinity Display: a near bezel-less, full-frontal glass, edge-to-edge screen.

*Screen measured diagonally as a full rectangle without accounting for the rounded corners.

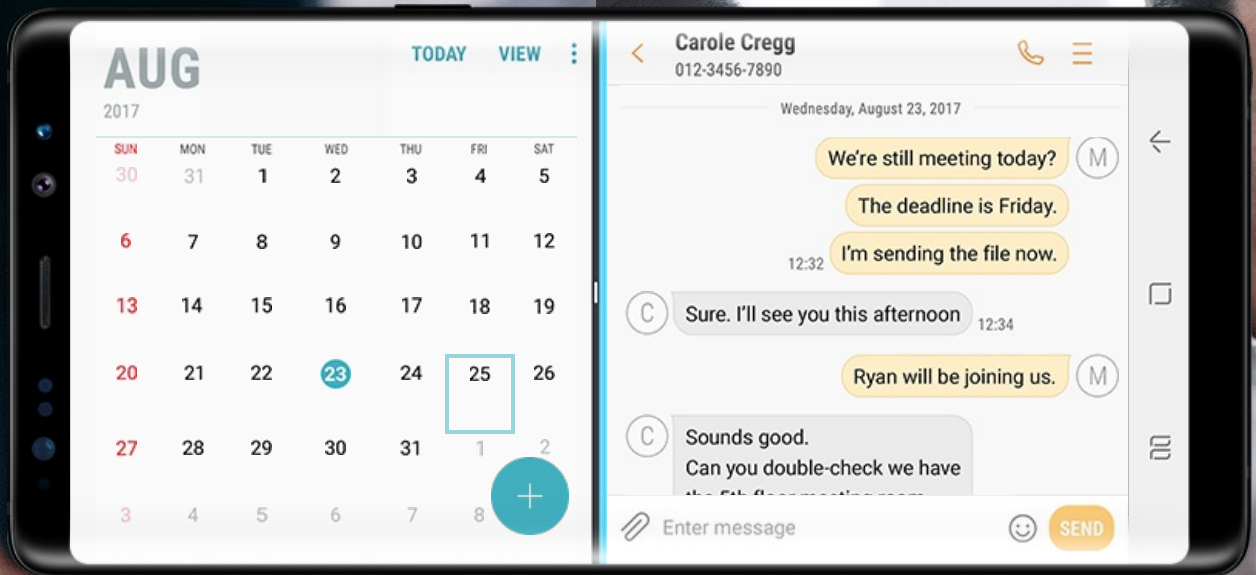

Multi Window

Multitasking done fast

The Galaxy Note8 makes multi-tasking much easier. Need to respond to an email while referencing a web page or attachment? No problem! With Multi Window mode you can view multiple windows to get tasks done faster and

with minimal fuss.

*Simulated images used onscreen for illustrative purposes.

Galaxy Note8 and S Pen: A powerful partnership

Together the Galaxy Note8 and S Pen provide a new way to communicate and complete business tasks. The S Pen features a fine 0.7mm tip and 4096 pressure levels, so it feels as natural as pen on paper. Get creative – sketch out ideas, craft technical drawings, jot down moments of inspiration, and easily perform everyday tasks such as currency conversion simply by hovering over the price.

*Samsung Account login and Wi-Fi or internet connection necessary.

Screen off memo

A great idea!

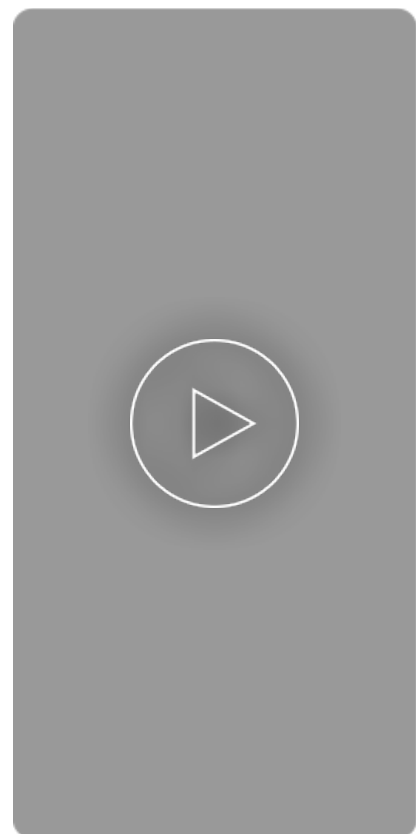

Moments of inspiration can vanish as soon as they pop into your head – so it's important to write them down as quickly as you can. Whether it's an idea for a new product, a better business process or a genius marketing idea – you can record your thoughts in an instant by jotting them down on the Galaxy Note8's Infinity Display with the S Pen and pinning them to the Always On Display to edit whenever you like – and because every second counts, you don't even need to unlock the screen.

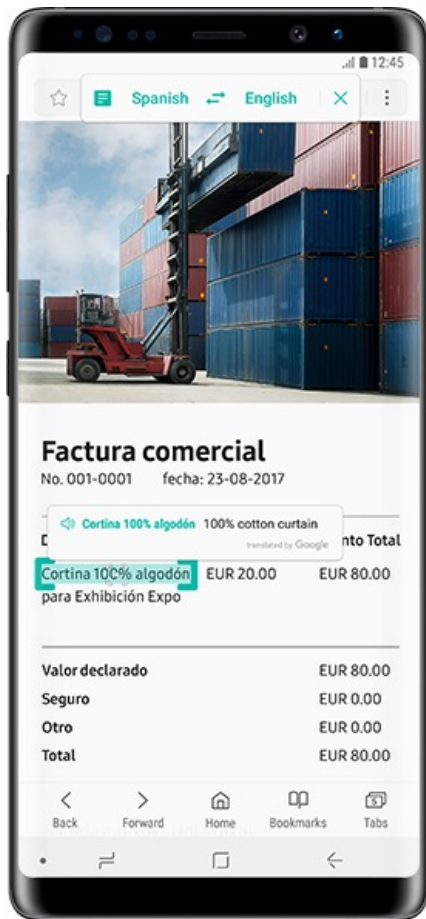

Live message

Messages that make more sense

Sometimes texts and instant messages need further explanation or a bit of context. Whether you need to explain a business process better or communicate with a colleague about design options, Live message lets you add an animated explanation or highlight something in a photo to get your point across.

*GIFs created may not be supported by some social media and messaging services, depending on the size and length of GIFs

Translate

Don't get lost in translation

As well as easily converting currencies and measurements, the S Pen makes it easy to translate different languages. If you're on a business trip and need to translate something on a document, or you have an email from an international supplier that you need to convert to English, simply select the Translate option through Air Command and hover your S Pen over the word.

*Supported languages may vary depending on country or region.

*Samsung Account login and Wi-Fi or internet connection necessary.

Productivity

Samsung DeX

Bixby

Dual Messenger

Samsung DeX

Make your phone your desktop

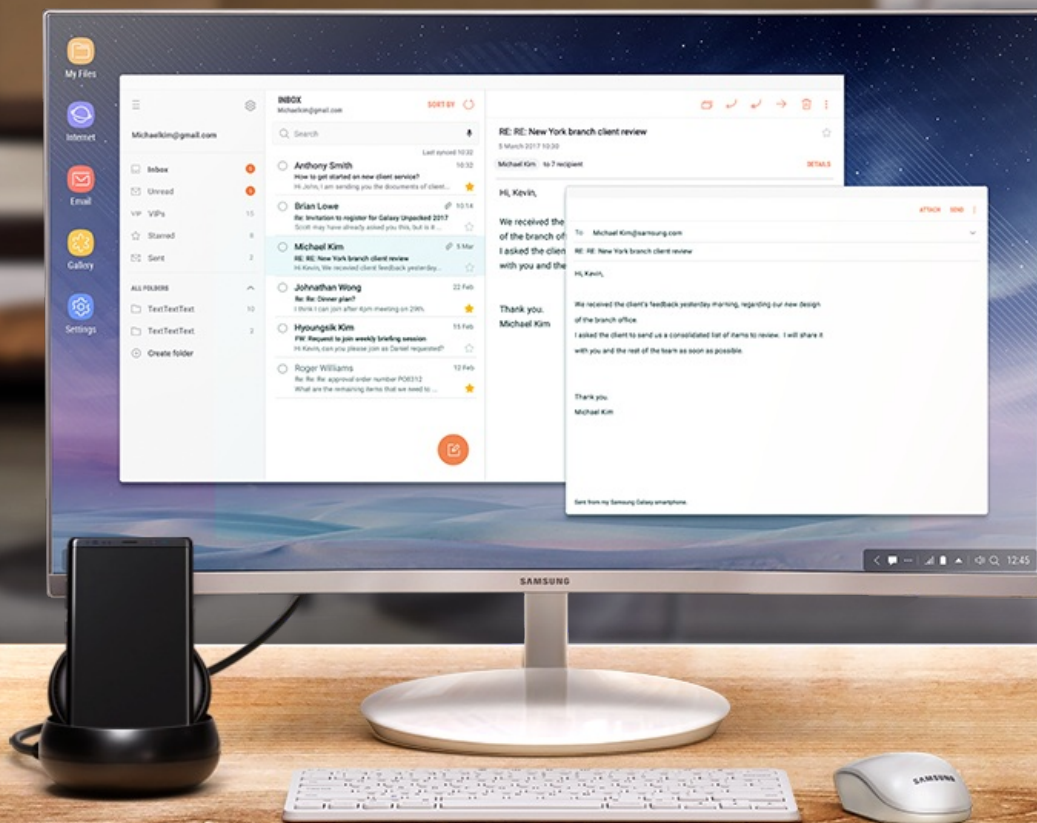

Phones are great for consuming content – catching up on emails, checking your calendar and staying up to date on social media. But Samsung DeX helps you get work done – enabling you to make, create and do by docking your Galaxy Note8 and connecting it to a monitor, full-size keyboard and handy mouse. With DeX you can quickly switch from working on the move to making a difference at your desk. Plus DeX works in harmony with Knox, so your data stays secure when in desktop mode too.

*DeX Station and accessories including monitor, keyboard, mouse, and HDMI cable sold separately.

*Certain apps may not run or require license (for purchase) on Samsung DeX.

*Screen image simulated.

Bixby

A smarter way to use your phone

Say hello to Bixby, your brand-new personal assistant. Bixby's on hand to help you organise your day and complete work tasks quick and easily. Use Bixby Home to keep track of your day and help you stay up to date with what's important to you, set alarms with Reminder, translate documents just by pointing your camera at them, and add new contacts simply by taking a photo of their business card. No more sifting through menus – if you want something done, just ask Bixby.

*Supported languages may vary depending on country or region.

*Samsung Account login and Wi-Fi or internet connection necessary.

*Some Bixby features may not be available depending on country, region, or language.

Voice

Ask Bixby to add meetings to your calendar or call clients hands-free.

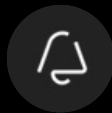

Vision

Get translations and pull contact information from business cards with your camera.

Home

Get quick and easy access to important information and your apps on your personalised dashboard.

Reminder

Set location or time-based alarms to remind you of important tasks.

Dual Messenger

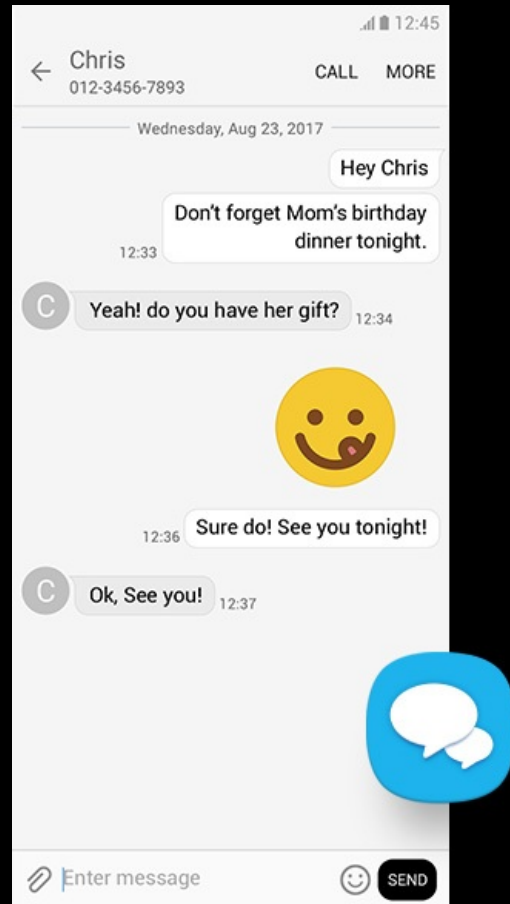

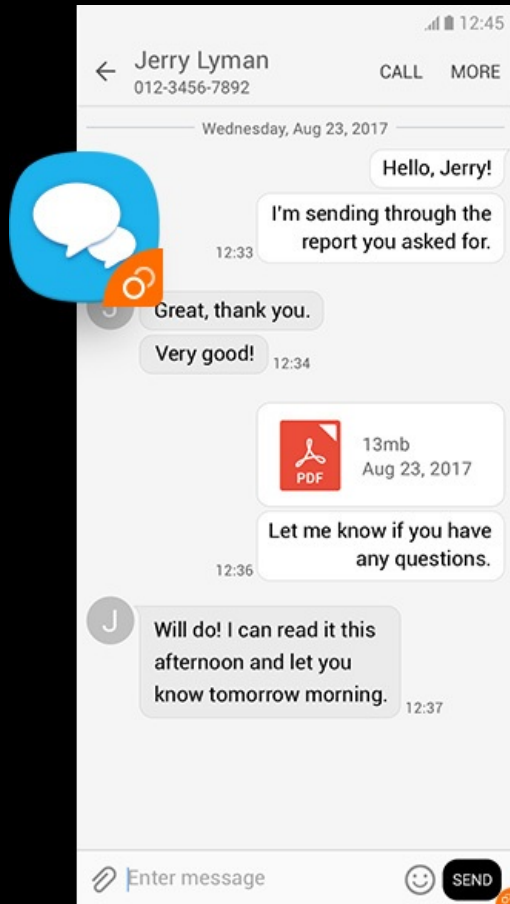

The perfect work-life balance

The Galaxy Note8 perfectly blends business and pleasure. With Dual Messenger there's no need for separate business and personal phones – you can set up separate accounts for your favourite messaging services to keep conversations with clients and colleagues completely separate to chats with friends and family.

*Dual Messenger service may vary by apps.

Samsung Pass

Knox 2.9

Defence-grade security for an open world

The Galaxy Note8 features Samsung Knox 2.9, which enables you to work more effectively without compromising security. Knox provides multi-layered defence-grade security – built into both the hardware and the software – so your phone and any business data you have stored on it are well protected against security threats. With the Galaxy Note8 you can focus on the work at hand, while Knox keeps an eye on security.

[Go to Samsung Knox](#) 

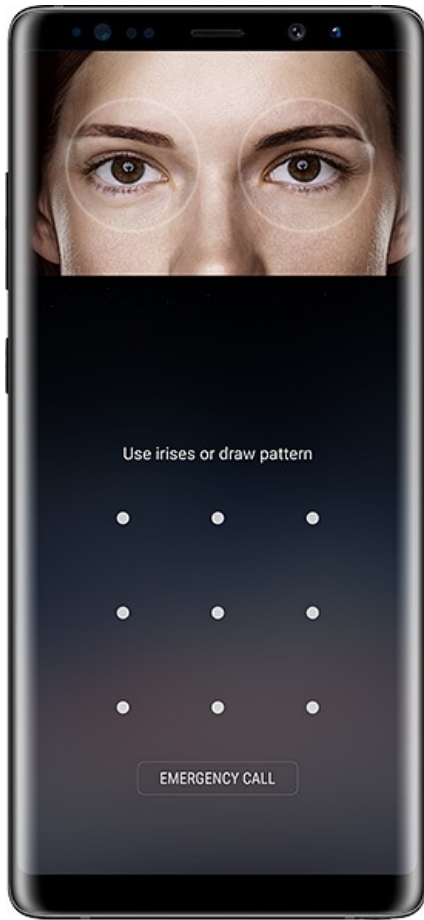

Biometric Authentication

Eyes, fingers, face... security that's unique to you

Lost your phone? The Note8 features three additional methods of biometric authentication to choose from – iris scanning, fingerprint scanning and facial recognition – which makes it far more difficult for anyone other than you to unlock your phone and access your data.

Iris Scan

Fingerprint Scan

Face Recognition

Enterprise Support

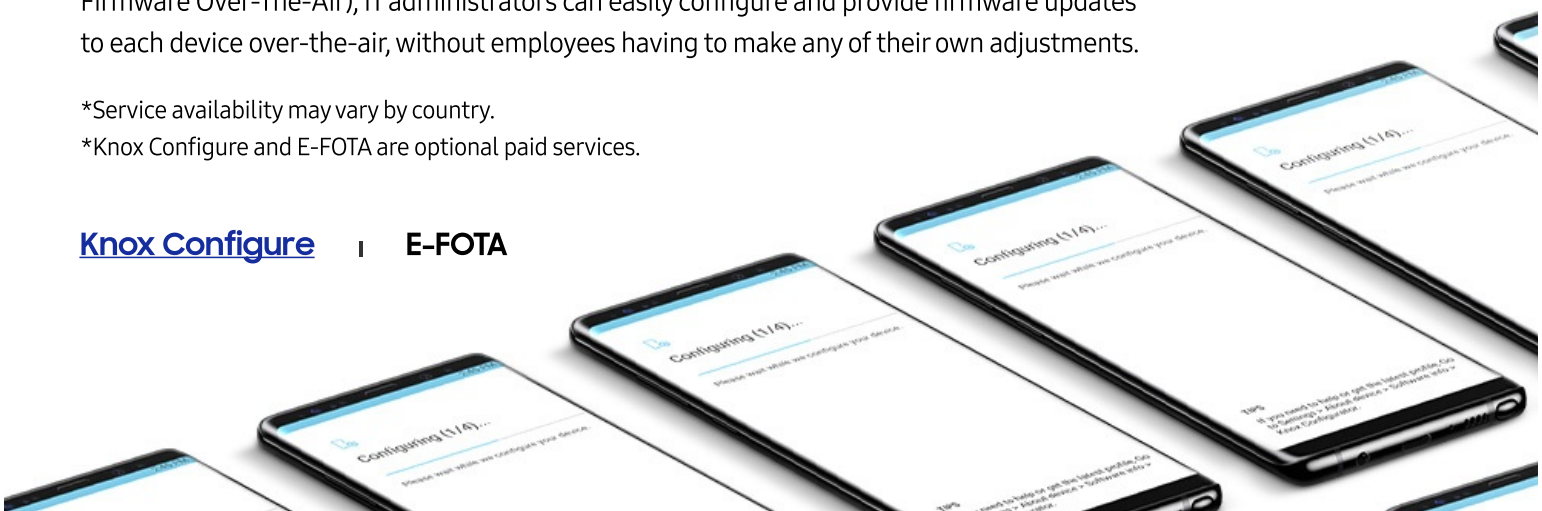

Business mobile management made easy

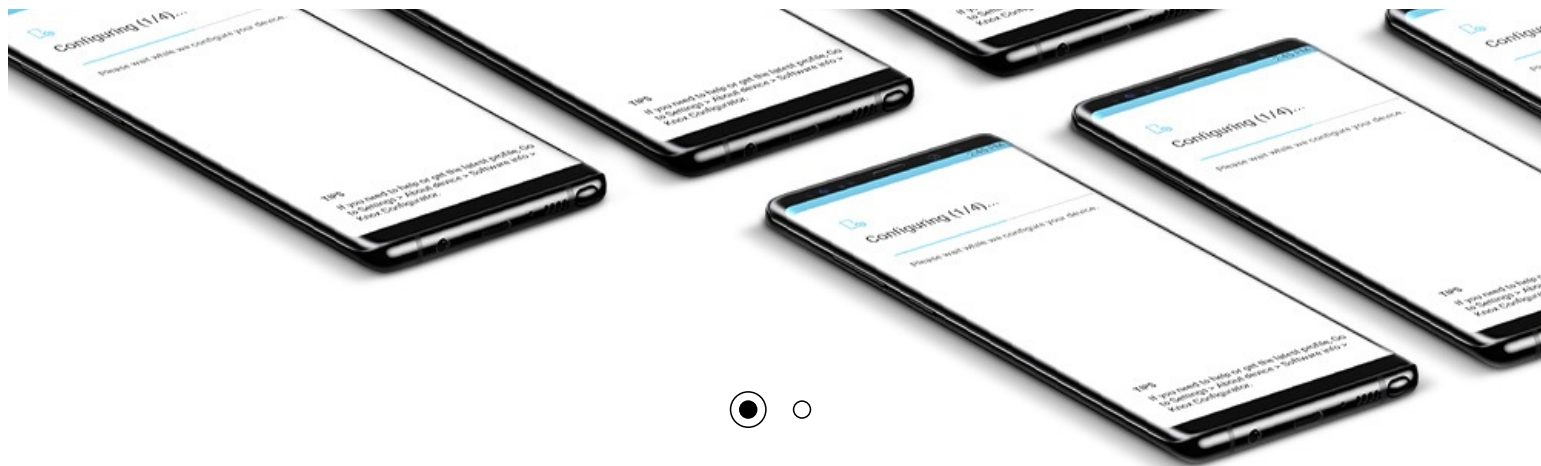

Thinking about introducing the Galaxy Note8 to your business, but don't want the hassle of employees having to configure their own phones? With Knox Configure or E-FOTA (Enterprise Firmware Over-The-Air), IT administrators can easily configure and provide firmware updates to each device over-the-air, without employees having to make any of their own adjustments.

*Service availability may vary by country.

*Knox Configure and E-FOTA are optional paid services.

Samsung Pass

Forget remembering passwords

Samsung Pass on the Galaxy Note8 is the quick and convenient way to access your corporate accounts. You can log in to your email or enter websites without having to enter a password. Samsung Pass uses super-secure biometric authentication, such as your unique fingerprint, iris scan, facial recognition, or even an e-signature. It's all protected by Samsung Knox too, so it's totally safe and secure, and makes your life that little bit easier.

*Availability of Samsung Pass may vary by country.

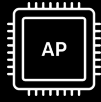

*e-Signature services may vary between third-party apps.

Resistance

Dual Camera

Bigger, better photos

Capture stunning photos and vivid videos for your social media channels and business communications on the Galaxy Note8's 12MP dual camera. Even in challenging conditions, such as unsteady environments or low light, the camera delivers. Plus, the Dual Pixel Sensor provides a fast and precise focus, so you get the shot you need to share and engage effectively with your business audience.

10nm AP

Do bigger things faster

The Galaxy Note8 benefits from a super-fast processor and 6GB of RAM so you can multitask like a master, present with confidence and power through work projects. The processor is built to be efficient too, so you can work with several programs, apps and browser windows without having to constantly reach for the charger to boost your battery.

Expandable Memory

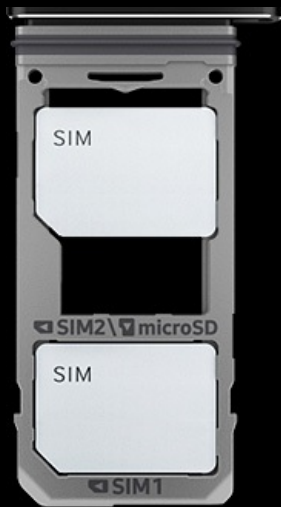

More memory to do bigger things

With 64GB of internal storage and the option to add up to an

additional 256GB of microSD storage, the Galaxy Note8 lets you carry your work with you wherever you go. Put the final touches to an important presentation, edit a PDF or work on a Word document even when you're away from the office. The Galaxy Note8 is the flexible way to do business.

*Availability of the 128GB or 256GB internal memory may vary by country.

*MicroSD card sold separately.

Dual SIM

Two phones in one

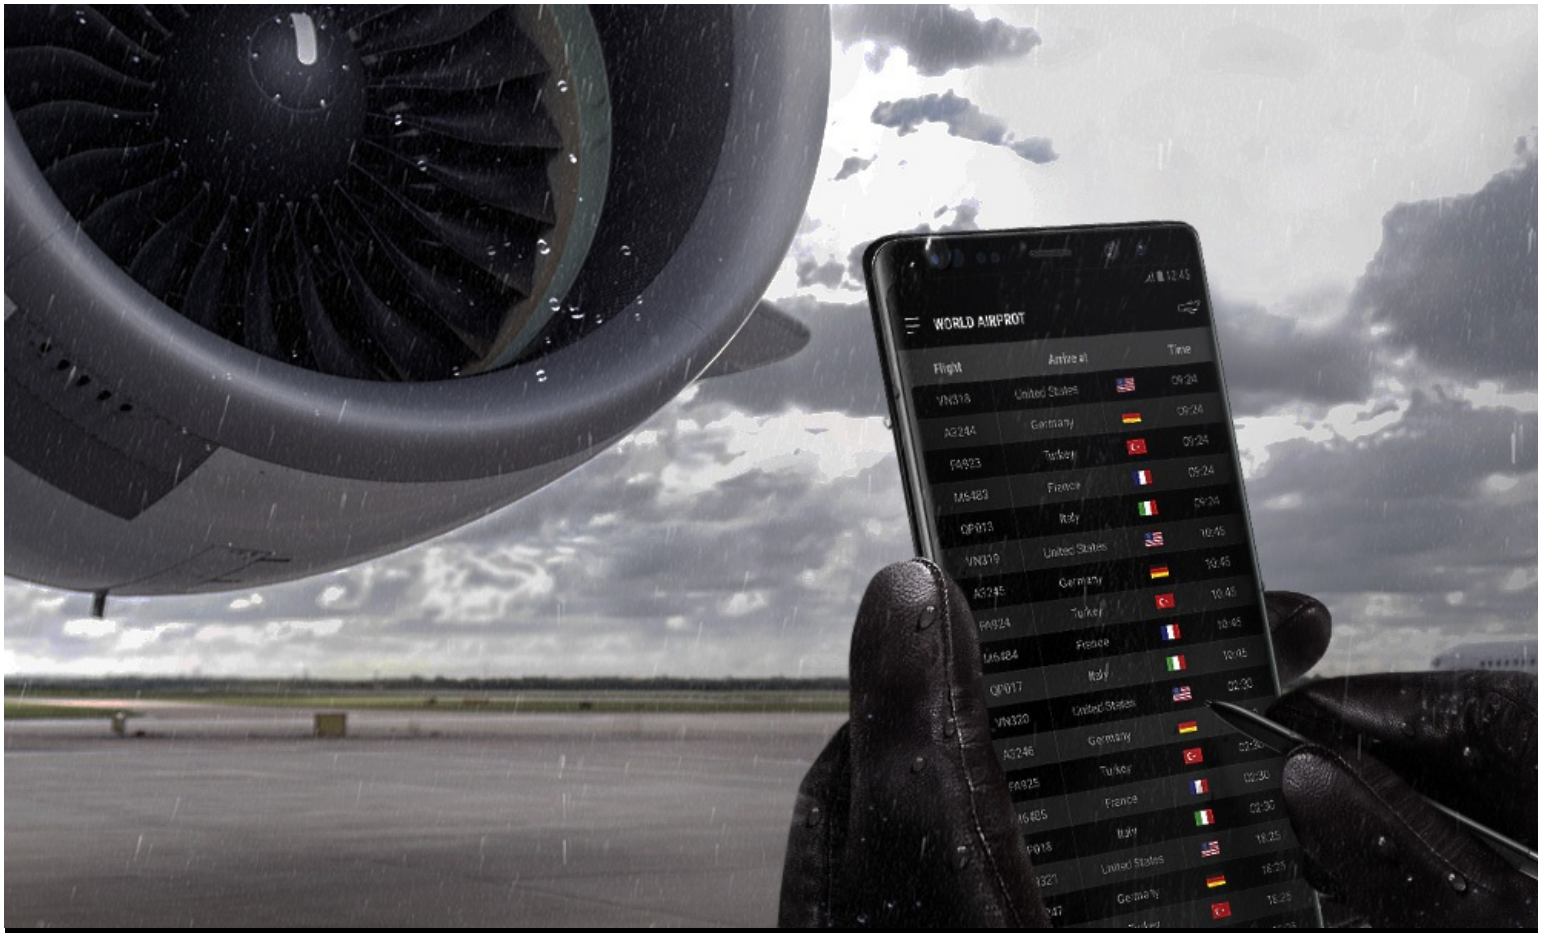

The Galaxy Note8 can handle two SIMs, so you can seamlessly switch between two different phone numbers – perfect for keeping business and personal calls separate, or for staying in touch with family and colleagues back home while using a local SIM during a business trip.

*Availability of dual SIM may vary by country and/or carrier.

Water and Dust Resistance

Built for business on the move

Locate your client's office on Google Maps during a downpour or craft technical drawings on a dusty building site thanks to Galaxy Note8's and S Pen's IP68 water and dust resistant rating. Plus, the Galaxy Note8's military-grade Protective Standing Cover offers strong protection from accidental drops and shocks.

*Galaxy Note8 and S Pen are rated IP68, meaning they are both protected against dust ingress and are water resistant. Water resistance rating is based on test conditions of submersion in up to 1.5 meters of fresh water for up to 30 minutes.

*Tested to conform with US Military Standard (MIL-STD-810G-516.7)

*Protective Standing Cover sold separately.
