Spacemaker™ Pro access and dissector system

Optimized access for hernia repair^{†,‡}

The Spacemaker™ Pro device gives you optimized access for abdominal wall repair.^{†,‡}

To achieve optimal results for hernia repair, you need to reach the places that are hard to reach. The Spacemaker™ Pro device gives you easy, one-time access to surgical spaces with its uniquely integrated system.^{1,2,§} It includes a low-profile 5 mm optical trocar that can enhance your ability to operate in small places.^{2,3,§}

Spacemaker™ Pro access and dissector system

An efficient hernia repair solution†

The Spacemaker™ Pro device is the right choice for small spaces.

We designed the Spacemaker™ Pro device to be a hernia repair solution that meets your surgical needs. It’s efficient, so it cuts back on procedural steps using an integrated access and dissection solution.^{1,2,‡}

Learn more about Spacemaker™ Pro

Customizable for you

Spacemaker™ Pro is easily adaptable to your specific technique and can be used as a system or as separate devices.^{1,3}

Preheader: Get a solution-focused path to better dissection with the Spacemaker™ Pro device.

As a surgeon, you want a simple way to achieve the most optimal results. The Spacemaker™ Pro device is an all-in-one hernia care solution offering optimized dissection.[†]

Better visualization^{1,2,†}

The anatomic balloons and clear cannulas of Spacemaker™ Pro devices enhance visualization and create the right space for your procedure.^{1,2,†}

Easier usage^{1,2}

The device's tailored cannulas also make insertion and full balloon deployment easier.^{1,2}

Make the industry's first all-in-one access and dissector system for hernia repair your choice for an efficient and effective surgical tool. Try the Spacemaker™ Pro device today – contact a rep to get started.

Spacemaker™ Pro access and dissector system

Enhanced design for better hernia repair[†]

As a surgeon, you need the best available tools at your disposal for hernia repair. The Spacemaker™ Pro device has an optimized design for minimally invasive component separation technique (MICST).^{1-4,†} Its uniquely integrated system allows you to operate in small spaces with confidence and assurance.^{5,‡}

[Learn more about Spacemaker™ Pro](#)

Designed to reduce wound complications

With its unique design, the cylindrical balloon on the Spacemaker™ Pro allows for a minimally invasive approach. The midline fascia can be closed without tension, which allows for reduced wound complications associated with traditional open component separation.^{1-4,†}

Medtronic

Spacemaker™ Pro access and dissector system

Combining innovation and value for better hernia repair

Get to the next level of advanced hernia procedures with the Spacemaker™ Pro device. This all-in-one system provides an integrated access and dissection system, designed to help deliver better control during the procedure and better outcomes for your patients.^{1-2,†}

Learn more about Spacemaker™ Pro

A uniquely integrated system

The Spacemaker™ Pro is easily adaptable to your specific technique and can be used as a system or as separate devices.¹

The comprehensive kit includes:

- Two Versaport™ bladeless optical trocars designed with a unique “dolphin nose” tip for easier trocar placement[†] (up to a \$170 value at no additional charge)
- Integrated 12 mm optical trocar and dissection balloon
- Obturator for insertion of balloon without the all-in-one system
- Balloon inflation bulb
- Endo-Lube™ solution
- Syringe
