Exhibiting reverse-glass abstract paintings and photographs by artist Christopher Martin. Inspired by the patterns and rhythms of nature, Christopher harnesses water, wind, and heat to create intricate layers of iridescent paint on acrylic with spectacular effect. Visit the artist's new upstairs studio for a diverse exhibit in digital photography, featuring series that freeze tiny microcosms within nature and capture the colors of New York City and London. Also featuring sculptural works in stone, marble, granite, and bronze from renowned California artist David Middlebrook.
