Body: Marvel Studios just released one helluva trailer for *Captain America: Civil War* and everyone is going mad with excitement because of its Avengers-sized cast and its promise to deliver a ton of action in what will officially be the longest film in the Marvel Cinematic Universe (MCU) so far.

There have been plenty of speculations since the start of production on who may or may not appear in *Civil War*—the beginning of the epic 68-character (Yes, you read that right!) clash between #TeamIronman and #TeamCaptainAmerica. While some may be okay with a good old fashioned superhero battle royale, it is interesting to watch The Avengers split down the middle and fight over genuine ideological differences.

And with Sony Pictures Entertainment finally agreeing to release one of the most iconic superheroes into the MCU, it sure looks like the newly-cast Spider-Man (Tom Holland) will be swinging through more scenes in the movie than we expected. Just how important Spidey's (He's on #TeamIronMan, by the way!) role might be in the next summer's *Captain America: Civil War*, we can't wait to find out!
