

# Cryptocurrency investment advice you shouldn't ignore

## Doing this one thing will protect your downside during the coming bull market

Dear Name,

A little while back, you decided to make a change in your life.

You decided to join a select group of subscribers to *Crypto Investor*.

That makes you unique in the world of investing.

Why? Because you saw an opportunity in the corner of the market that intimidates many investors, and you seized it.

Now, your courage is being rewarded.

We are witnessing the beginning of a historical breakout in the cryptocurrency market. An advance in blockchain technology that will be unveiled in the coming months promises to increase cryptocurrency processing to real time.

Combined with a growing distrust of fiat currency and a runaway national debt that threatens to undermine investments and savings, and you have all the ingredients needed for a once-in-a-generation bull market.

### The Breakout Market Has Begun

During a recent five-month frame, cryptocurrencies racked up outrageous gains for investors who knew how to uncover value in this market. Here are just a few.

- Bitcoin gains over 244%
- Stellar rose nearly 258%
- Ethereum went up nearly 399%
- Litecoin moved up 452%
- Polkadot shot up over 705%

Again, that's over a five-month period!

Needless to say, the big Wall Street institutional investors are sitting up and taking notice.

The same financial institutions that dismissed cryptocurrency and cryptocurrency investors not too long ago are now racing to position themselves to profit from the cryptocurrency revolution.

When the likes of JP Morgan and Goldman Sachs start adding cryptocurrency to their portfolio, you know the new era of cryptocurrencies have arrived. According to one crypto research firm, more than 81,000 BTC alone are held by publicly traded financial institutions.

Recognition of crypto as a new asset class by institutional investors will further accelerate the growth of the cryptocurrency market. Having one of the last barriers to common usage fall by the wayside is great news for cryptocurrency.

## **What Does This Mean for *Crypto Investor* Subscribers?**

Mainstream financial institutions will profit from the crypto revolution because they have investment resources at their disposal that the average investor doesn't.

Fortunately, as a subscriber to *Crypto Investor*, you have the same advantage.

You have access to my easy-to-understand library, which explains the varieties of coins and the technology behind them. Presented in an easy-to-understand format, you'll never be intimidated by cryptocurrencies again.

Armed with this cutting-edge knowledge and my investment advice, you're well-positioned to see huge gains when the cryptocurrency market begins its steep climb.

## **Where Will You Be When the Cryptocurrency Market Reaches Historic Highs?**

The technological advancement currently underway in the cryptocurrency market will change the world in much the same way as the internet has.

The importance of this moment can't be overstated.

If you've followed the cryptocurrency market since its nascent days, you've probably recognized a pattern that is similar to the path of internet technology.

An initial bubble develops when people begin to adopt the technology and recognize its potential. A trough occurs when investors realize that the existing technology can't quite deliver on its potential, followed by a boom period when an advance in technology transforms potential to reality.

**Cryptocurrencies are following the same pattern that led us to Internet 2.0**

Internet 2.0 delivered incredible gains for investors in the know. And it secured the foundation for companies that became household names.

Think Google. Think Amazon.

And now savvy investors like you who subscribe to *Crypto Investor* will have just the right tools and advice at just the right time to capitalize on the next cryptocurrency bubble.

Think of it as Cryptocurrency 2.0

Only one question remains. Will you still be with us when the market skyrockets? Or will you be on the outside, watching others cashing in on gains you could have made?

Having your subscription lapse when you're this close to realizing huge gains can lead to one of the biggest investment mistakes you'll ever make.

## **The Number One Regret I Hear the Most from Cryptocurrency Investors**

It never fails.

Hardly a week goes by without me hearing this one regret from past cryptocurrency investors. It usually goes something like this.

"I bought \$100 of Bitcoin back in 2010, but I sold it when the Bitcoin market really took off. If I held onto it, it would be worth \$28,341 today."

It's a common regret I hear all the time.

These laments are similar to those of investors who bought and sold shares of Google and Amazon in the early days, never realizing the enormous gains they could have banked had they followed the advice of an experienced, successful guide.

Unfortunately, they didn't have a proven investor with industry knowledge and a successful track record to guide them on their investment journey.

You do.

The journey to incredible gains during this once-in-a-lifetime opportunity won't be smooth sailing.

If you're on your own, you're more likely to end up with more regret than profits if you don't have a trusted, experienced advisor by your side during this bull run.

## How to Avoid the Biggest Mistake Cryptocurrency Investors Make

By signing on to *Crypto Investor*, you placed your trust in me to help guide you to seeing enormous cryptocurrency investment returns while minimizing loss.

As you can see from our recent open positions, we've delivered.

- Bitcoin Cash gained 211%
- Ethereum rose 246%
- Stellar increased 323%
- Ripple went up 742%
- Tether shot up an astounding 1665%\*\*

Now, I'm going to ask you to trust me one more time.

When I created *Crypto Investor*, my goal was pretty simple: Help investors capitalize on a new corner of the market.

But it goes deeper than that.

I can attribute my financial success to people who educated me – in many cases, coached me - early on in my career. I benefited from their hard-fought wisdom and experience. Their advice helped me become a leading voice in the field of cryptocurrency investing.

The truth is, no one can be successful in investing – or life – without having some help along the way.

I see my mission as extending beyond simply being an investment guide. I want to be a resource that subscribers can turn to for investment advice and wisdom. Not just for the foreseeable future, but for the long haul. I want to be the person who'll be with you today and down the road, helping you navigate whatever investment challenges arise.

That's why I hope you seriously consider what I'm about to offer you.

Extend your existing subscription to a lifetime subscription today, I'll knock off 39% from our regular price – [a lifetime subscription to Crypto Investor for only \\$1,195](#). That's a savings of \$3,005 off our regular subscription price of \$4,500.

In times like these, with political turmoil and COVID related issues swirling about, it's easy to take your eye off the ball. Extending your subscription is a way to ensure that you'll have a dependable voice you can trust in your corner today and in the future.

All you need to do is pay one time. After that, you'll never have to pay again. You won't have to worry about missing renewal notices and missing critical updates due to a lapsed subscription.

And with returns like we've experienced, you won't have to worry about making back your payment. As you can see in our portfolio, our results have been spectacular. And they're looking even better for the future.

## **Don't Put It Off – Extend Your Subscription Today!**

They say each of us is the architect of our own future.

I couldn't agree more.

Cryptocurrency investors with guidance and know-how will see returns most investors only dream of. By extending your subscription to *Crypto Investor* to a lifetime subscription, you'll have the opportunity to join them.

I want to see you realize profits like the 272% gain we banked after recently closing our position on Litecoin.

Make the decision today to be the architect of your financial future – simply [click here](#) and take secure your place among my limited group of subscribers.

It's one of the best-and easiest- investment decisions you'll ever make.

Sincerely,

Dylan McDermott  
Editor, *Crypto Investor*

*P.S. – Secure your place in the coming crypto bull market now! With cryptocurrencies set for astronomical gains along with our great lifetime subscription rate, your downside is already covered. What are you waiting for? [Click here and secure your place with us today!](#)*
