**Try our music-inspired
writing prompts!**

Music often takes us to a time and place in our lives. If you could create a playlist of the songs that define your life, what songs would you include?

If an alien from another planet landed on earth, what song would you play for them to help them understand human life? Why that song?

What is your favorite genre of music (e.g. classical, jazz, rock, R&B, hip-hop) and why? What life events, memories or experiences do you associate with it?

What is a memory you have in your life that is associated with music? How did music impact that moment in your life?
