

INNOTEK®

Quicker Training. Better Dogs.

ULTRASMART™

NEW!

Collar the Market on In-Ground Fencing

Here's the faster, easier way to keep dogs safe and at home. New INNOTEK® ULTRASMART™ in-ground fencing systems set a new standard for pet containment. The difference is in the sleek streamlined comfortable collar – 30% smaller and lighter than other containment receivers. The collar's built-in ReadyTest™ technology offers 3 key benefits. It tells when the collar is ready and working, and shares graduated status of the battery. You even get a pleasant audible tone that assures proper collar contact with the dog's neck!

A PATENTED INNOTEK® EXCLUSIVE!

ULTRASMART™ In-Ground Pet Fencing.

We've taken elements of our best-selling in-ground fencing and added the collar that consumers told us they want! Sleek integrated collar is lighter and more comfortable than other containment solutions. ReadyFit™ assures positive skin contact. The system transmitter features 24/7 battery backup, so that the containment system operates even if there's a neighborhood power failure. Ask about our Express Install system!

ULTRASMART™ Contain & Train

Only INNOTEK™ can offer containment and remote training systems in one package. The comfortable ULTRASMART™ collar does double duty, both as a containment collar and as a remote training collar. Train in the yard, or outside the property. System includes all elements of our ULTRASMART™ in-ground fencing system, plus an ultra-small pocket-sized controller. Training features 7 levels of stimulation, tone-only training, and more.

ULTRASMART™ Contain & ZONES

Pet containment is made even more handy with the addition of ZONES pet proofing barriers. The ULTRASMART™ collar works to contain the dog in the yard, and teaches him to avoid areas in the home – trash cans, kitchen counters, fine furniture. System includes all

**You'll always know
the system is ready
and working!**

Key Features:

- 1 ReadyTest™** - Ensures correct collar fit, graduated battery status, and warns of potential system problems for greatest pet safety.
- 2 Sleek, Integrated Collar** - 30% thinner than other collar designs, a fraction of the weight. More comfortable for the dog.
- 3 Waterproof** - Collar and transmitter stand up to rough punishment, even submerged under water.
- 4 Rechargeable Collar** - Fast-charging, long life Lithium Ion batteries.
- 5 Expandable** - Add multiple dogs to the in-ground fencing system with extra collars (sold separately).
