

Relion[®] advanced protection & control. Time curves available in leading software tools.

The Relion product family offers the widest range of products for the protection, control, measurement and supervision of transmission and distribution power systems. The 605, 610, 611, 615, 620, 630, 650, and 670 series overcurrent coordination curves are available in leading power systems engineering software such as ETAP, EasyPower, Milsoft, and ASPEN. Relion curves will be available in additional distinguished power system engineering tools in the near future. The curves provide the necessary selectivity for protecting your assets with minimum service interruption. www.abb.com/relion.
