#### Bearclaw Kitchen

There are so many delicious products we sampled from [Bearclaw Kitchen](#), that we had to show great restraint not to carry them all (yet). They're made in a small neighboring city you may have heard of - Los Angeles - and their maple & honey granolas and trail mix are staples you'll want in your pantry all the time.

## CC made

I silently ate through 6 bags of **CC made**'s artisanal candied popcorn in less than a week. I didn't even get to share them with anyone. They have flavors ranging from gingerbread to rosemary almond...but, for now, I decided to bring you their classic artisanal and candy cane flavors. All you fellow desert dwellers missing that bite of winter: the latter one's for you! ❄️

Have a delicious rest of the week!
