Why Pluralsight?

We help businesses make the most of their people, processes and technology. With Pluralsight, teams develop the skills and work patterns required to successfully deliver technology solutions. Build teams that deliver on time without sacrificing quality, team productivity or customer satisfaction.

OUR MISSION
Advance the world's technology workforce.

ABOUT US We enable businesses to develop their technology teams so they can keep their competitive edge—and their top talent.

- Headquartered in Utah
- Founded in 2004
- Trusted by over 70% of the Fortune 500
- Supporting over 18,000 customers across 180 countries

PARTNERS

CUSTOMERS

What can you do with Pluralsight?

The answer is simple yet powerful—upgrade knowledge and skills while transforming how work gets done. Partner with us and you'll:

- Build internal tech talent mobility to retain high performers
- Keep pace with ever-evolving tech in cloud, AI and cybersecurity
- Upskill and reskill teams to better deliver tech-driven outcomes

- Reduce engineer ramp times and revamp team coaching
- Improve cycle times to boost delivery speed and quality
- Enhance tech culture to create happier, more productive teams

Customers report that Pluralsight helps them:

- Avoid costly attrition
- Attract in-demand talent
- Increase speed to market and quality
- Discover hidden internal talent
- Match team and individual skills to projects
- Create a culture of psychological safety

Customer success by the numbers

- BT measured £12.5m in ROI in 2021.
- KAR Global saw a 12% increase in coding days and a 28% increase in commits per day.
- Thomson Reuters added 3 more coding weeks per engineer per year.
- Snapshot increased AWS certifications among staff 10x within a year.

93%
of customers report ROI in 6 - 12 months

35%
reduction in cycle times

88%
of employees report increased work satisfaction

92%
of employees report better quality of work

96%
of businesses saw cloud transformation results before 6 mos.

84%
of cloud learners improved their performance

95%
of tech learning needs filled by Pluralsight

How Pluralsight gives you an edge

We are the only tech workforce partner who can help you truly develop—and retain—your technology talent.

Customizable solutions for top business needs

Tailor people and process investments to business objectives.

- Translate business strategy into current and future project plans that drive outcomes, such as workforce or cloud transformation

- Adapt skill development programs to specific tech stack and projects

- Build academy programs for technology centers of excellence, corporate universities and academies

Custom learning for every level

Meet every employee where they are with learning experiences for every learning style.

- Discover 3,000+ hands-on labs in security, data, ITOps and everything between

- Practice risk-free with thousands of cloud and software development labs and sandboxes

- Tap into the power of virtual instructor-led courses by authors who are experts in their field

- Allow employees to learn at their own pace with on-demand courses

Team insights that drive outcomes

Drive valuable actions with data to improve quality, efficiency, developer satisfaction and business ROI.

- Identify and close critical technology skills gaps

- Measure skill levels and progress over time

- Isolate and resolve workflow blockers

- Connect skill proficiency to code impact

- Understand what work gets done across teams

- Utilize data to improve developer team health

Unmatched breadth and depth

Get the right data and learning experiences to support specialized teams and company-wide initiatives.

- Create learning programs that develop skills in cloud, software dev, security, data and ITOps

- Access broad learning programs for company-wide data, digital and tech literacy initiatives

- Coach engineers and improve work patterns and engineering-wide resourcing and efficiency

How we help build better teams and leaders

We ensure you have the tools you need to create stronger tech teams that continuously improve, meet deadlines, ship products faster and keep up in today's accelerated digital world.

Empower technologists to grow and advance in their career

- See exactly what your teams know and need to learn with skills assessments

- Learn, practice and apply skills through expert-authored video courses, hands-on learning experiences and certification prep

- Upskill, reskill and redeploy talent in critical areas, such as IT, cloud, DevOps and security

- Get data on individual strengths and areas of improvement for better 1:1s and career conversations

Build better tech teams that deliver

- Use assessments, curated paths and analytics to assess and address skills gaps before teams miss deadlines

- See insights on where engineering efforts are focused, spot bottlenecks and inefficiencies and resolve issues before it's too late

- Use data to advocate for teams, whether it's providing additional coaching or noting where teams need to increase capacity

Align workforce development with strategic company objectives

- Map skill development to specific tech stacks while building an entire workforce of tech skills

- Get a holistic view of software delivery with insights across culture, activity, predictability and efficiency to inform product roadmaps and staffing needs

- Use assessments to inventory if teams have the skills required to meet strategic objectives

- See total engineering throughput over time to show executives how engineers are impacting initiatives and the bottom line
