

Pluralsight Skills

Where teams build better technology skills, faster

Technology teams are only as successful as their skills are relevant. Give them access to Pluralsight Skills—courses, assessments, learning paths, and labs—and you give them the tech fluency they need to build business-critical skills.

Trusted by tech professionals at thousands of orgs

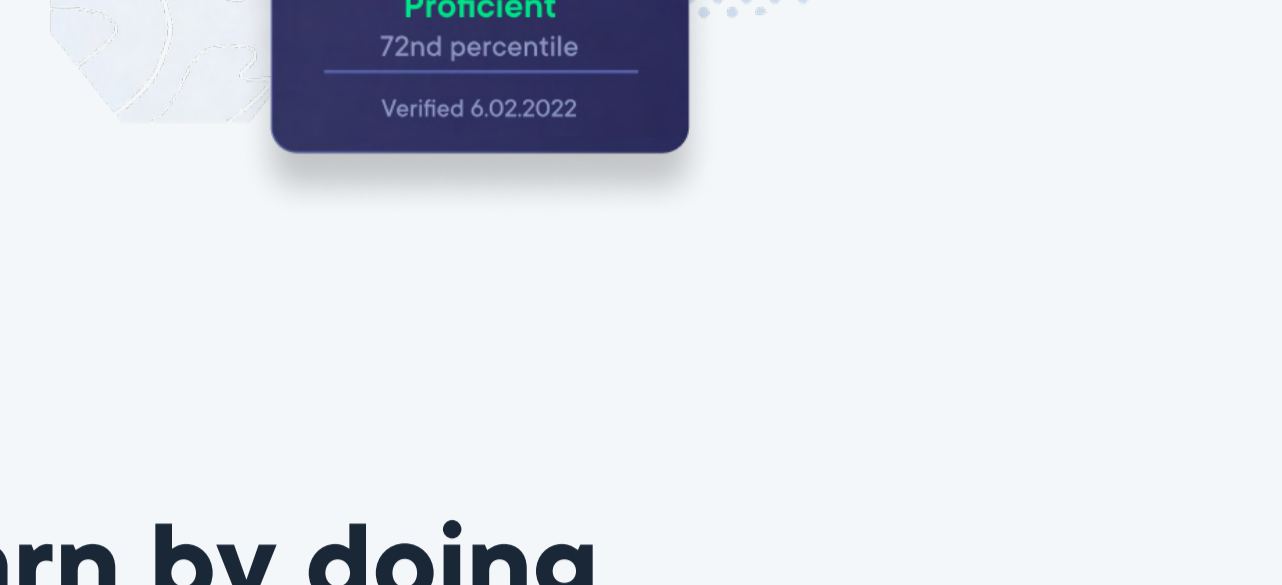

Upskill & reskill

Empower your tech teams to produce key business outcomes by making upskilling and reskilling as easy as powering up their laptop. Tap into the power of curated learning paths to guide teams through the exact skills they need to progress from novice to guru across a variety of tech skills.

Browse courses

Learning paths

Learn by doing

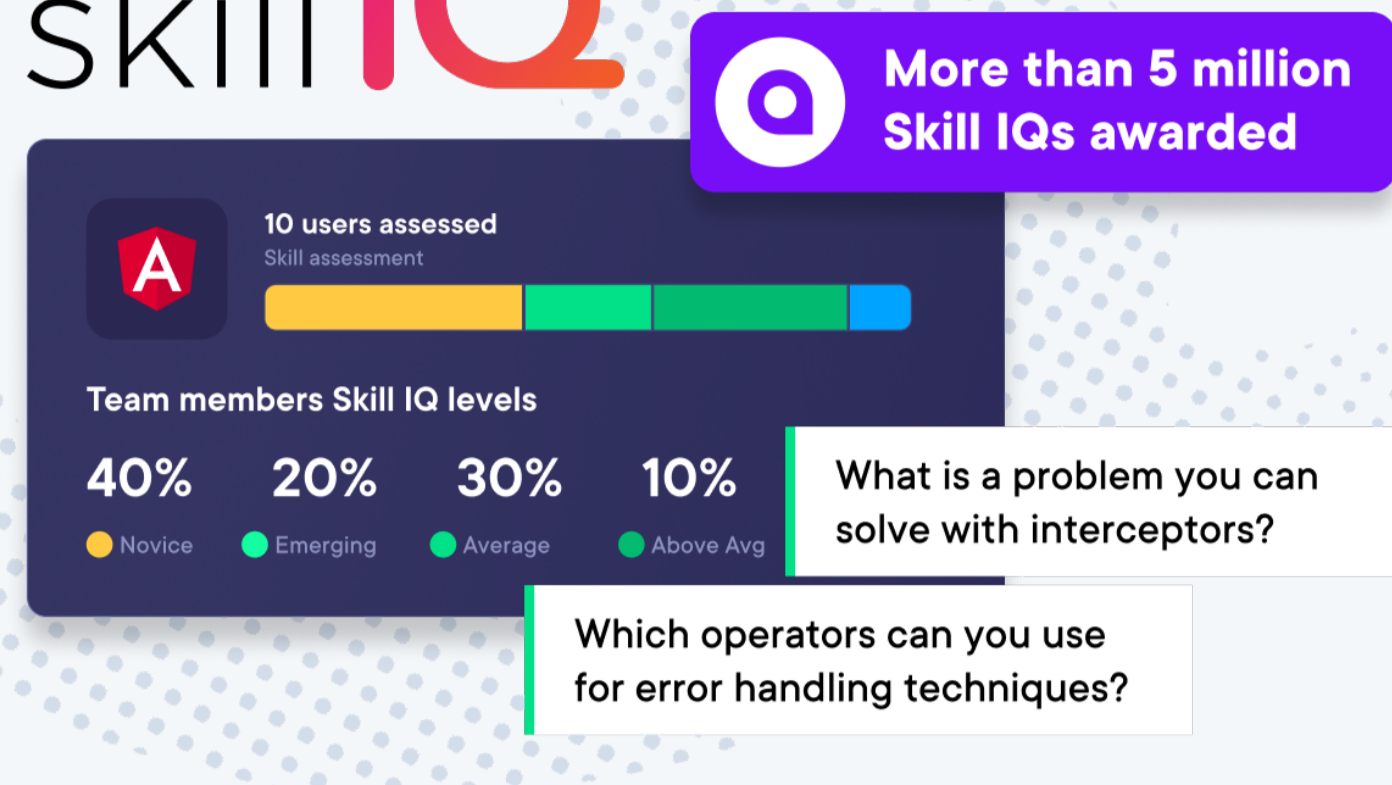

More than 1,300 hands-on labs enable technologists to develop stronger proficiencies in specific skills or technologies through step-by-step instruction, practice exercises, and projects. In fact, Skills is the only upskilling platform that offers labs across all technology domains. We've totally got you covered.

Explore labs >

Assess & evaluate

See where your team's skills stand with more than 360 skill assessments. With Skill IQ, you can benchmark your team's tech skills, identify knowledge gaps and strengths—or find out where you stand. Your team will also get tailored learning recommendations to help them level up. Then celebrate the milestones as your team advances toward mastery.

View skill assessments >

Dive into the data

Gain visibility into who has what skills and enable technologists to learn the skills most related to your top priorities. Then track progress with insights into skill development over time to ensure your org is prepared to deliver on key initiatives—all with quantified, assessment-backed data you can trust.

How you'll empower your teams

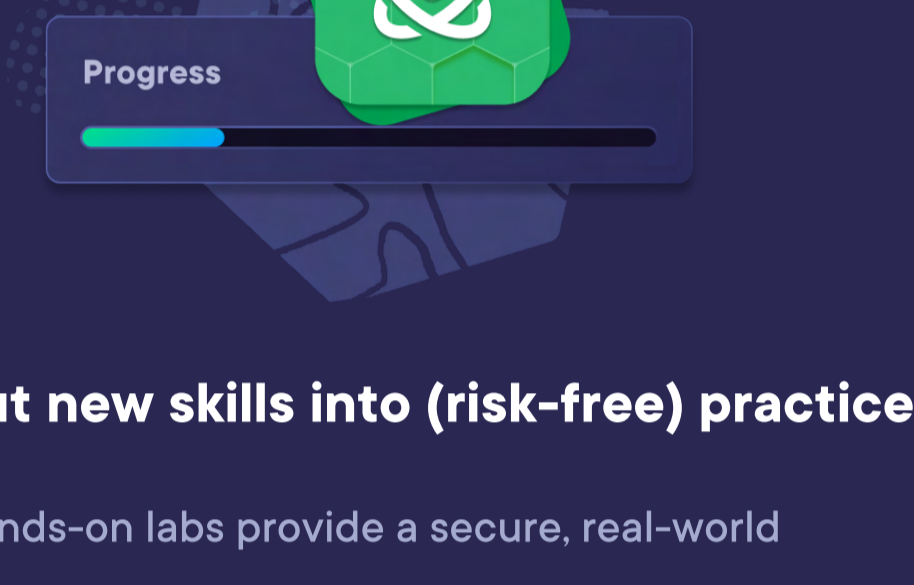

Master the most in-demand skills

Thousands of on-demand, expert-led courses and the ability to learn at your preferred pace help you close skills gaps and keep your tech talent.

Support your team's upskilling efforts

Curated learning paths guide technologists who aren't sure where to start, or where to go next, and deliver them safely, and skillfully, to their destination.

Put new skills into (risk-free) practice

Hands-on labs provide a secure, real-world environment to practice skills—no download or installation required—and mitigate risk to your org's systems.

Our solutions

Face the future with confidence

And with the skills and engineering insights to thrive, Our solutions enable tech teams to navigate digital trends and customer needs that continue to shift at lightning speed. Implement one (or more) and you'll transform your technology workforce—one developer, one delivery, one success at a time.
