

With your help, we're transforming Buffalo's food system.

For over 20 years, MAP has been connecting people to the land through education and empowerment on MAP's urban farm. Our farm is an agroecosystem that uses clean, living soil to grow nutritious vegetables to feed our communities.

However, extreme weather, transportation costs, and food inflation have exacerbated the food crisis, hurting more families every year. Imagine if we could end food insecurity for good and ensure every family has access to fresh, local food for generations.

This Spring, we need your help to raise \$13,000 so we can enhance our farm infrastructure, improve our farm's climate resiliency and increase community offerings.

[Donate Today!](#)

Your donation will feed more families and train more youth by growing our capacity at MAP's Urban Farm. Your support will have a direct impact by making these projects possible:

Greenhouse Repair and Henhouse Improvements:

We sustained damage in last winter's storms. By repairing our structures, we'll ensure the safety of our crops, stabilize temperatures and protect our flock of hens.

Irrigation System Installation:

It's become more difficult to keep our crops watered and thriving. With your help we can improve watering efficiency and reduce unnecessary labor to keep the best growing conditions.

Farm Tools:

Our farm equipment is in need of an upgrade due to extensive wear and tear. To tackle the projects coming up this summer, we need your help to repair, replace, and increase the number of farm tools available.

Community Programs:

To meet the community's needs, we're expanding our educational workshops, farm tours, and volunteer work days this summer. We're also giving more hands on individualized training to our farm interns and youth apprentices.

Join MAP's Farm Friends, our monthly giving community and you'll help youth and families to grow their own fresh food for generations to come.

Your donation will connect families to the land and grow nutritious vegetables to feed our communities. With your help, we can build a more equitable local food system to benefit people and the planet. None of this is possible without your generosity.

100% of your monthly donation will fund farm infrastructure projects, staffing, and community programs.

You can pause, cancel, or edit your payment method at any time.
